Psiphon: circumventing Net censorship

Tomorrow Hurrying Data Along

The amount of data we generate is exceeding predictions; more and more data needs to be transferred over wires and networks at various scales. Considering this, what future technologies will come to the fore?

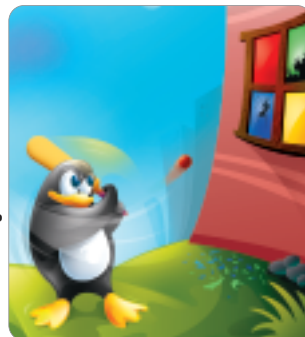

38

30 Days with iPod Touch 8GB

Everything pod deserves a review, preferably one written after having spent 30 days with it. This month's reviewer tries to see whether there's more to the Touch than the touchscreen

Insight Settling Differences

Any two semi-techies can get into a verbal deathmatch about whether Windows or Linux is better, though most agree that the latter is more secure. So, well, which is better, and if Linux is more secure, why?

29

Droolmaal

Would you believe there exists a quad-Xbox360 system, complete with fans to blow the wind in your face as you race? This and other more-than-attractive gadgetry—including a pair of headphones touted as the world's best!

Smart SoHo @ The Office

Well, you've decided on the office furniture and more—and it's about time you got your official site up and running. What, where, how? Here's a simple walk-through of what you need to do

98

Trends Biometrics For Security

We've written countless words about biometrics and how they'll lead to a more secure future. So how many people have gone ahead and implemented it? We rang some doorbells to find out...

102

Tech Careers Mapping A Future

Spatial image processing and analysis, Photogrammetry, GPS technologies, and more—the stuff a mapping career is made of, that is, everything to do with positioning, location, and such

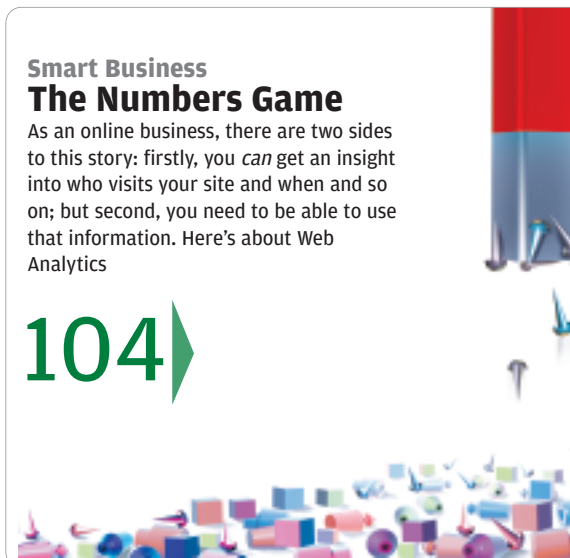

95

Smart Business The Numbers Game

As an online business, there are two sides to this story: firstly, you can get an insight into who visits your site and when and so on; but second, you need to be able to use that information. Here's about Web Analytics

February 2008

Test Centre Ion Maidens

Individual reviews of our cell phone pick—for now. (Yes, we know it's all going to change a year from now.) But you do want that new phone now—so go ahead, get a glimpse of what's on offer!

74

Test Centre Burning Up

They're ubiquitous, cheap, necessary, and taken for granted... that's DVD-Writers. Well, so which one?

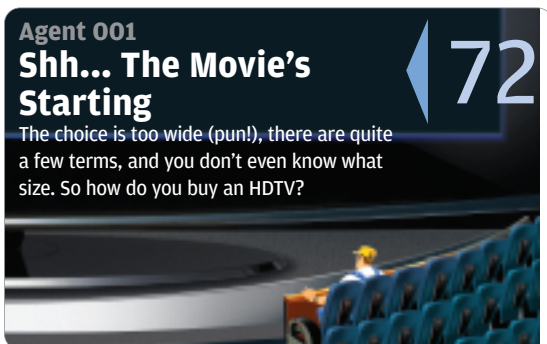

46

Agent 001 Shh... The Movie's Starting

The choice is too wide (pun!), there are quite a few terms, and you don't even know what size. So how do you buy an HDTV?

72

94

Know More About Root, Boot, Etc.

Here's about the Linux directory structure—which you really should know about, and about which there isn't a man page

54

Bazaar

A monster of a motherboard from Intel—and an iPod dock that fails to impress. Then there's the Palit 8800GT 512 Sonic which looks a winner, and then an overpriced external HDD from Buffalo... a mixed bag of products this month

109

Touched By Tech No Holds Barred

Here's a sort of round-up of what's happening in the world of the blind or near-blind. People are doing things to help them, with the help of technology; and they are using technology to help themselves

124

Tabloid Tech

Five months ago, we said Pamela Anderson loves her Wii; then just a couple of months ago, we reported the same about Jessica Alba. And now, it turns out Queen Elizabeth II loves her Wii, too—only it isn't hers

Game On

This month's intrepid reviewers try their hand(s) at four mobile games, in addition to *Team Fortress 2* and the newest NFS iteration—*Need for Speed: ProSpeed*
