

INTRODUCING THE ALL NEW ARCHER C2600

WITH BLAZING SPEED OF 2600MBPS AND MULTI-USER MIMO TECHNOLOGY, THE ARCHER C2600 IS THE PERFECT EXTREME WI-FI SOLUTION FOR ENTERTAINMENT AND GAMING ENTHUSIASTS

A router designed for the future is how we would define the powerhouse AC2600 Wireless Dual Band Gigabit Router – Archer C2600. Featuring speeds as high as 2600Mbps combined with a Multi-User MIMO technology, a 4-stream 11 AC wireless technology, and a 1.4GHz dual core processor, the Archer C2600 delivers flawless and seamless Wi-Fi performance during high-bandwidth activities like multi-player online gaming and multi-device video streaming.

WHAT IS MU-MIMO?

The next generation of Wireless AC technology, the Multi-User MIMO lets the Archer C2600 serve several mobile phones simultaneously at speeds that are up to 3X faster for all devices on the network. Unleash the full power of your high-performance PCs, smart TVs, and consoles by using this router to seamlessly stream 4K HD videos and play games across multiple devices at once with MU-MIMO, powered by Qualcomm® MU | EFX.

WHAT MAKES THIS ROUTER SO POWERFUL?

The router is equipped with a 4-stream 11 AC wireless technology thanks to which its highest Wi-Fi speed multiplies to maximize performance. It leverages this power to deliver four independent, yet sharable, spatial data streams across all internet-enabled devices including smartphones, tablets, TVs and game consoles. The powerful 1.4GHz dual-core processor also ensures the smooth handling of simultaneous surfing, streaming, and gaming.

With four long-range external antennas and high-powered amplifiers, the Archer C2600 provides extensive network coverage, maximizing the signal strength

PRICE & AVAILABILITY:

The Archer C2600 will be available in all markets starting 20-Nov-2015 for Rs 15699 INR.

so that users can stream videos and game freely without losing their wireless connections. The router's beam-forming technology also lets wireless signals be picked up by specific devices so as to enhance the home networking environment.

FAST & FURIOUS

To maintain a superior quality experience across multiple devices, the Archer C2600 utilizes its dual 2.4GHz and 5GHz bands to reach a combined blazing speed of 2600Mbps, delivering more than two gigabits per second. The Archer C2600 has four Gigabit Ethernet ports for easy connection with other internet devices, and two USB 3.0 sharing ports for data transfer ten times faster than the USB 2.0 standard.

WANT MORE? YOU GOT IT:

- LEDs can be turned off at night to prevent distraction, especially if the router is located in the bedroom or near furniture.
- The Tether App lets you configure the router via your fingertips.
- Quality of Service (QoS) by device and application ■
