Tesla Model X

A futuristic electric car with a ludicrous speed

After making the world realise that even electric cars can possess a sense of elegance, Tesla had announced their next iteration with the Model X, an entry into the SUV category. And as expected, the car doesn't fall short of reflecting how cars will be designed in the future. With falcon-wing doors, reminiscent of the DeLorean from Back to the Future, our hero Elon Musk stated that it's the safest car in the world which will receive a five star safety rating. The Model X will now be available to the public and sell in three variants where the cheapest version 70D will start at around ₹53 lakhs. The lower end 70D will be capable of travelling with a top

speed of 225 kmph and cover an estimated distance of 354 km. The mid-variant 90D will be able to travel a distance of about 414 km at a top speed of 250 kmph. The high-end P90D drops the travel distance to 403 km but bumps up the max speed, enabling you to go from 0-100 kmph in 3.8 seconds or just 3.2 seconds if you opt for

the Ludicrous mode. It definitely does sound ludicrous for an electric car to reach these speeds. If the Autopilot feature made your jaw drop and evoked an urge to have it for yourself, the upgrade on this model will cost you ₹1.7 lakhs. Adding up all the possible upgrades will sum up the Model X with a price well over ₹66 lakhs.

Merlin Digital Light Bulbs

Light bulbs with the ability to change colours is cool. Cooler is the colours changing according to music. The LED light bulbs from Merlin Digital are capable of this pulling off this feature. It claims that 252 bulbs can be connected simultaneously over Wi-Fi and the colours can be changed individually. It allows you to choose about 15 million colours from a colour wheel so, you'll have enough freedom to set the lighting in your room.

Elecom Dux

Macro keys are always welcome by MMO gamers and to completely fulfil this desire, Elecom has come up with the Dux MMO gaming mouse with 19 programmable buttons.

Pepsi Phone P1s

Pepsi has introduced its crowdfunded phone sporting a 5.5-inch full HD display with 2GB RAM and 16GB storage, running on a MediaTek MT6592 SoC, priced under ₹14,000.

Bold Motion

HP has partnered with Swiss watchmaker Movato to create the Bold Motion, a premium and subtle looking smartwatch, compatible with both Android and iOS through Bluetooth.

Figment VR

VR headsets aren't small enough to fit into your pocket, but Figment VR is an iPhone case which can be transformed into a VR viewer with just the click of a button.
