

BeoPlay A6

Bang & Olufsen has always been a luxury brand for audio products and the BeoPlay A6 clearly proves the level of intricacy the company goes into building their products. The design is unique which broadly looks like a pillow and the company claims that it enables the sound to fill the entire room. The front panel is covered in high-quality designer fabric made of wool, supplied by Danish studio Kvadrat. The wireless speaker supports a few gestures on the top such as swiping to the right increases the volume, a quick tap skips the currently playing track etc. The sound is delivered through a pair of 5.5-inch woofers, a pair of 0.75-inch tweeters and a single 1.5-inch full range speaker. It can connect through Bluetooth, AirPlay and DLNA, thus expanding the sources to play music. The BeoPlay A6 is quite expensive at around ₹68,000 but it scores high points on the design front.

Parrot Bebop 2

It's quite a frenzy out there as more drones start emerging in the skies and almost everyone in the neighbourhood buys one. It ain't an abomination yet if you haven't bought or flown a drone before, and certainly you should try to get your hands on one. Joining the plethora of drones buzzing across the countryside is Parrot's Bebop 2. This upgraded drone will be able to stay in flight for about 25 minutes, doubling the amount of time possible in the previous version. Since, this drone is intended to stay light, there isn't a mechanical stabiliser on-board but it's dependent on software image stabilisation. The drone sees through a 14MP fisheye lens, storing all the captured scenes in 8GB of flash storage. The Bebop 2 will cost you about ₹36,000 and it can be flown using either an iPhone, Android or a VR headset device through Wi-Fi. If the VR headset bit caught your attention, the headset which is the Skycontroller will be available in a bundle pack priced at ₹53,000. The drone can attain a maximum speed of 60 kmph, something which would be an amazing experience through the VR headset.

PNY BE-740

Since smartphones haven't been able to get rid of their battery life problem, power banks have become an essential commodity to carry around with you, especially for long trips. Not all power banks are fancy enough but regular bars or slabs of battery enclosures. The BE-740 power bank from PNY packs a 10,400mAh battery inside a sleek body which gives a good grip owing to the curved design. It also houses an LED torch on one end. The design is quite attractive and you would definitely want your friends to see and hold the power bank. The power bank charges devices quickly, thanks to the 2.1A output, and you can expect about 2-3 full charge cycles for your smartphone. It has an LED indicator to notify the battery left through four levels. The device comes with a one-year warranty as well.
