

YouTube Center is available as user script, Firefox plugin, Opera and Safari extension. The Chrome extension is currently taken down and is currently being reviewed by Google.

Download YouTube Center from <https://github.com/YePpHa/YouTubeCenter/wiki> for your browser and you are good to go.

Download YouTube videos without download manager

If you're not using YouTube Centre there's a neat way to download the videos without the need for any download manager. To do this just add "ss" between "www" and "youtube". For example rewrite this link "<https://www.youtube.com/watch?v=WL980ZscY6Q>" as "<https://www.ssyoutube.com/watch?v=WL980ZscY6Q>" and you'll be redirected to "savefrom.net" from where you can select the download quality and start downloading the videos directly.

Share trimmed videos

Sharing a part of the video has always been a painful task. This easy trick will let you do it in seconds. Copy the following URL and replace the parts according to your requirement.

[http://youtube.googleapis.com/v/\[video ID\]?start=\[starting seconds\]&end=\[ending seconds\]&version=3](http://youtube.googleapis.com/v/[video ID]?start=[starting seconds]&end=[ending seconds]&version=3)

Replace "video ID" with the unique video identifier from the original URL. "starting seconds" and "ending seconds" is the time duration that you want to share. Note that if time is in minutes or hours you should convert it to seconds first. The "version=3" in the URL is equally important otherwise the video will continue playing after the ending time.

For example the following link "<https://www.youtube.com/watch?v=WL980ZscY6Q>" can be shared as "<http://youtube.googleapis.com/v/WL980ZscY6Q?start=10&end=30&version=3>".

Note: Make sure you use "https" and not "http".

Play non-playlist videos as playlist

If you follow a particular YouTuber you'll never like to miss any of his newly uploaded videos. If you don't want to search for his new addition just follow this trick. Add "&list=UL" at the end of any video from his channel and you'll be presented with a meta playlist containing all the videos from him in chronological order. For example write this link "<https://www.youtube.com/watch?v=WL980ZscY6Q>" as "<https://www.youtube.com/watch?v=WL980ZscY6Q&list=UL>".

This trick also comes handy in the case where the Youtuber doesn't have a playlist.

Use shortcut keys

You must have witnessed that YouTube doesn't use standard shortcut keys for video playback. We all are used to pause video by hitting the spacebar, however, YouTube decides to deviate from these standards. It has its own set of shortcut keys which you need to know.

- K - Pause/Play
- J/L - Back/Forwards 10 seconds

- Left/Right - Back/Forwards 5 seconds
 - F - Fullscreen
 - M - Mute
 - Buttons 1-9 - Navigate through the video
- Once you are into the video

"media.mediasource.webm.enabled" and change it to "true".

This been done you'll be able to watch 360-degree videos. Pan through the video by dragging the mouse. Additionally, 360-degree videos also support

Drag the mouse or use the nav buttons to watch in 360 degrees.

(in fullscreen mode or have clicked anywhere in the player) you can use spacebar to pause your video.

Watch 360-degrees video

If you are unaware YouTube has started accepting 360-degrees videos since last year. Google Chrome readily supports 360-degrees video but some versions of Firefox don't. For Firefox to support YouTube's 360-degrees video you need to tweak the browser. To do it, type "about:config" in the address bar and hit enter. Search for

Android and iOS. Compiled with the ability to make the most out of the gyroscope you can tilt your smartphone accordingly to pan the videos.

Try TV version of YouTube on your PC

You can now get TV version of YouTube on your PC. If you are a fan of the neat and minimal TV interface try this trick. Instead of firing "youtube.com", use "youtube.com/tv". Sit back, relax and use this UI to control YouTube using your keyboard.

Use arrow keys to navigate and enter key to play it. Addi-

Try the clutter free UI.
