OUR PICK OF THE BEST TECH ARTICLES FROM AROUND THE GLOBE

(MUST READS)

SOCIAL NETWORKING THEN

Long before it was made accessible to the people or commercialised or even made smarter with AI, social networking meant being connected to a few hubs and a handful of nodes. Here's the history of social networking from its birth to the internet boom, we share.

THE END OF CODE

Coding has been the base of programming, but it requires logic as well as it is vulnerable to hacks. With the AI revolution just around the corner, is it about time to unlearn coding as we might not have to code but train the future programs and computers, just as we do to our pets.

A year with the Apple Watch

Revising a gadget and re-reviewing it after weeks or months of usage is common for reviewers, but not many go back to review a piece of technology that they have been using for 365 days in a year. Here's everything you should know about the Apple Watch.
