

ELAC Uni-Fi UB5 Speakers

The ELAC Uni-Fi UB5 Speaker reportedly has deep bass, deeper than any other at this price range, which is amazing on speakers of this build and size. It boasts superb midrange tonality and clear voices. In comparison to its cheaper predecessor, the ELAC Debut B6, the Uni-Fi UB5 aims to outclass it in every way, with deeper, better defined bass, clearer midrange, and treble. At the \$500 (₹33,800 approx) price tag, you're getting a three-way design, quality hi-fi performance, and all packed up in a nice compact package. With a 5.25-inch aluminum cone the bass is likely to be decent obviously, but not just that you also have a 1-inch tweeter and 4-inch mid range driver. If you've got a decent amplifier (at least 40 watt RMS) or receiver to go with this beaut you've got yourself a true high-fidelity performance and extraordinary sound quality.

Nerf N-Strike Elite Terrascout

Nerf's new N-Strike Terrascout Battle Tank is every boy's wet dream. It looks like a Mars rover with a gun attached to it, right out of some science fiction movie. The N-Strike uses a wireless remote with a live video feed from the tank's camera, so you can remotely snipe at your friends and family from the safety of well, wherever you feel safe. The tank itself is powered by a rechargeable battery while the wireless controller is powered by four AA batteries. This beast can traverse over almost any terrain as long as it's not wet. You can remotely fire the 18-shot cannon which can be aimed independently and doesn't rely on the direction the tank is driving. Footage shot by the 720p camera can even be recorded on an SD card, so you can relive the best moments of your sneaky, or maybe not-so-sneaky attack. The Nerf N-Strike Terrascout will be out later this year and at the \$200 (₹13,500 approx) price tag, well, it better be a ton of fun.

Xiaomi Mi Box

The Xiaomi Mi Box is a new Android TV-powered 4k set-top box. It comes with an array of new apps in addition to the Android TV makeover which was announced at Google's I/O. The Mi Box supports 4k Ultra HD content as well as all the latest HDR standards. Popular apps such as Netflix and Hulu will be available for download. The Mi Box can also mirror your phone or tablet's screens with its in-built Google Cast feature. The Mi Box comes with a Bluetooth remote control that has voice search capabilities. The Xiaomi Mi Box specifications include a Quad-core ARM Cortex-A53 CPU, 2GB of RAM, 8GB of internal storage, a USB port, HDMI 2.0a, and DTS Surround Sound to name a few. The official pricing and release date for the Mi Box have not yet been announced but it will soon be available in global markets.
