

7 Zeppery

Founded in 2015, Zeppery offered the option to browse food menus and pre-order food to avoid long queues. However, Zeppery shut down just six months after launch. The reason for failure, according to one of the founders is that the model was ahead of its time for Indian markets. This, along with competition from fellow food-tech startups and high retention costs. Zeppery is the latest startups on this list to shut down, on date of writing this article in fact.

8 AmberWellness

Following PepperTap, AmberWellness, an online beauty startup founded in August 2015, ceased providing services in all three cities it was operating in. They had raised funding of close to \$1million from an angel investor but pulled out of the market in May 2016, making a conscious call to step out of the business due to the low margins, according to the founders.

9 PepperTap

Based on a similar model as that of BigBasket and Grofers, PepperTap was the third most funded hyperlocal grocery startup in Q3 2015, operating in 17 cities. In April 2016, the startup decided to cease their operations after 17 months of rapid expansion, identifying major discounting as one of the main reasons for excessive cash burn and lack in ability to scale their technology as rapidly as demanded.

11 Trevo

Young IIT and IIM alumni minds ventured into the bus pooling space with Trevo, an app for intra-city travel. The service was operational in Gurgaon and Delhi but within a month, Trevo halted its operations. Reports and experts say that the inability to raise fresh funding was the reason for Trevo's shutdown. Interestingly, the minds who founded Trevo were the same ones that launched TalentPad earlier, which has also made it on to this list.

10 Bonafide

A two year old Bitcoin startup – Bonafide.io, was founded with the aim to provide data to Bitcoin companies along with exchange and wallet services. It ceased its operations in 2015. Bonafide was listed in the Silicon Valley's 500 startups incubation program and managed to raise around \$850,000 in 2015. But all was in vain when the founders realised that the idea was ahead of its time and saw little chance to be able to generate revenue.

12 SchoolGennie

Founded in 2013 with the aim to create an online ERP tool for schools, the founders of SchoolGennie spent over 15 lacs in 11 months before quitting their jobs. They ended up with a product that couldn't find any buyers and taught the founders an important lesson – know your product and customers before you invest. Read the story here: <http://dgit.in/SchlGne>

13 DeliverWithMe

To meet logistics challenges in India, DeliverWithMe came up with a crowd-sourced e-commerce delivery platform that would get your parcel delivered with its peer to peer network by people travelling between same routes. In return, users were rewarded vouchers from partnered brands. The service caught good traction at first, but the founders soon went on to realise that the entire model had several drawbacks, especially security. In addition to excessive cash burn and differences between the cofounders, DeliverWithMe ceased in 2014. Read more here: <http://dgit.in/DwmSD>

14 AdMagnet

Founded in 2008, AdMagnet was backed by major seeders like Sequoia Capital. This digital advertising network used to provide data related to ad impressions across various categories and audience segments, helping advertisers to reach their target users. In October 2015, AdMagnet ceased its operations with undisclosed reasons. Although reports already hinted at it, the likeliest reason cited is one of the cofounders leaving the company with many other executives in tow.

15 Dazo

Founded in 2014, Dazo received funding from big names such as Rajan Anandan (MD, Google India), Amit Agarwal (Country CEO, Amazon) and various others, but that still wasn't enough to save the startup. Dazo still had to shut down due to lack of funds in October – just within a year of its launch. According to reports, the reason Dazo shut down was due to its inability to scale its customer base and partner restaurants, as compared to its competitors.
