

1 Feature phones

They are rare to find these days, but if you find one, you could use it as a dedicated alarm clock or a mobile device that doesn't run out of charge easily. You can also repurpose it to use it as a travel charger. Make yourself a portable battery pack, using your old feature phone, or even following these steps: <http://dgit.in/MkePortCh>

2 Smartphones

If your smartphone is just lying around, you can consider using it for simple tasks, such as a dedicated VoIP, or videocalling, or as a music streaming device. One way to reuse it is to use it as a GPS for your car. You could also repurpose your device to use it as a universal remote, if it has an IR blaster. If you want to turn your old phone into a smart mirror, here is how: <http://dgit.in/SmrtMirr>

3 Tablets

If your outdated tablet is just lying forgotten, after you got your new tablet, you can use it as a digital photo frame. You can also stream content onto your smart television, or hook it up to a USB typewriter: <http://dgit.in/USBTypew>

4 Routers

While installing your new router, you can reuse your older one by using it as an access point or an amplifier to cover areas where the signal tends to get weak. Flashing it and installing a custom firmware, like OpenWRT, will enable you to unlock it. You can also make it an smart hub by following these steps (<http://dgit.in/IoTRtr>)

5 Gaming Consoles

Gamers always have special memories of their consoles and when they get old, instead of adding it to the number of showpieces at your home, you can consider repurposing it and using it as a phone dock (<http://dgit.in/PSiDock>

and <http://dgit.in/NCtrlDck>) or put some life in your dead NES by attaching a RaspberryPi (<http://dgit.in/NESRbPi>). You can use one of the controllers to make your own night lamp <http://dgit.in/NesNgtL>. In case you want to geek out and have an Arduino around, connect it to your old NES to make yourself a music player <http://dgit.in/NesMP> or a toaster (<http://dgit.in/NesToaster>) or even a wireless light switch <http://dgit.in/WLtSwth>.

6 Monitor

If you have a couple of CRT monitors or TVs lying around, it can become your pet's new home or a even fish aquarium! You can also get rid of everything inside the monitor shell and use it as a bookshelf, to show off your geeky, but creative side. If it is still working and you are willing to tinker with it, you can try converting it into a private monitor by following these steps <http://dgit.in/PrvcyMn>.
