

LEGO®

THROUGH

The Lego group is far more than just a toy making company now and has a series of successful video games under their belt. Let's find out more!

uilding blocks are something most of us have played with as kids. And when it comes to building blocks, Lego are considered to be the OG. We've all seen our fair share of Lego memes and quite a few of us have probably also suffered the pain that comes with stepping on one. There are few franchises in existence today that can be claim to be as iconic as the Lego franchise.

Lego has been around for a really long time. The Lego Group was founded in Denmark, way back in 1932. The name Lego itself is derived from leg godt,

which is a Danish phrase that translates to "play well". For those of you who are poor at math, that's a whopping 84 years ago! Back then all they did was make wooden toys. It wasn't until early in the 1950s that Lego evolved to become the building bricks that we know and love today. Of course at the time it wasn't anything like it is now and there would be more changes to come but this is when Lego established itself as the "building block" toy that we know and love.

Since its humble beginnings Lego has been growing in leaps and bounds, from just a meagre 10 employees to OVER 9000! by the 2000s. Of course they've

become more than just a toy making company now. They've successfully made a name for themselves in other avenues as well, as we can see from all the successful movies and video games they've released to date.

For the purposes of this article we'll only touch the licensed stuff, and we've got a lot to cover so let's get right to it, in chronological order of course.

2001

Lego Creator: Harry Potter was the first ever licensed Lego title and was of course based on the ever popular Harry Potter franchise. This was however just a
