

THE AGES

construction and management simulation wherein players could exercise their creative ability. Players could revisit familiar rooms and areas from the movie and create and build stuff. It was soon followed by Creator: Harry Potter and the Chamber of Secrets, and as the name suggests, it focused primarily on the second movie. You'll notice however that this game doesn't have Lego in its title. This is the first game to release without Lego in its title and was also co-published by Electronic Arts which could probably be why it doesn't have Lego in its title. Neither of these titles made use of the core Lego gameplay that's being widely used in their games now.

2005

It wasn't until 2005 with the release of Lego Star Wars: The Video Game that we

first see the gameplay format that we're all so familiar with now. This was the first of many such licensed games to come which would follow the same playstyle. It came out the same year as the release of the Star Wars III: The Revenge of the Sith. Lego Star Wars followed the story of the three prequel movies nicely put into one enjoyable package.

2008

In 2008 we see the release of two titles. The first one being Lego Indiana Jones: The Original Adventures. This game was based on the first three Indiana Jones films, Raiders of the Lost Ark, Temple of Doom, and Last Crusade. The gameplay was similar to the Lego Star Wars games and would become a staple in Lego titles to come.
