

ject Eternity, is another classic RPG that takes notes from several popular classics and mashes them together into one super RPG. Long time RPG veterans will immediately feel at home and notice elements similar to Baldur's Gate. It's rich with lore and has an epic tale to tell. Tactical gameplay, thick and lush maps to explore, and loot galore, what more do you need? If you're a fan of old-school isometric RPG with in-depth tactical combat and rich lore, this is yet another title you should definitely try out.

FTL: Faster than Light

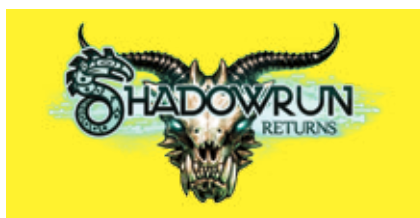

Take control of the Kestrel and manage its crew as you travel through the galaxy and attempt to discover its secrets. Faster than Light is a strategic real-time combat game, where you need to think

on your feet and make the right decisions. You're in charge, so you decide which part of your ship to redirect power to and which enemy to target. It's far from easy but highly addictive. It's a short game but it has huge replay value, and at its core, a huge tactical soul. You need to decide whether to take risks or play it safe, and you need to do it fast. If you think you've got a strategic mind, give this game a try and push yourself to the limit.

Shadowrun Returns

This 2D RPG is the much awaited sequel to the much loved Shadowrun. The game features some amazing tacti-

cal turn-based combat in addition to a great plot staying true to the first Shadowrun. It's a game that offers both simplicity and complexity with its gameplay and depth of story, which is a hard thing to pull off. All of the above paired with some great artwork results in yet another great classic-style RPG title you wouldn't want to miss.

Sir, You Are Being Hunted

Sir, You Are Being Hunted has a fairly simple concept, you're on an Island inhabited by hostile robots who want to

hunt you down and kill you. Your job is simple, do what you must to survive. Sneakily evade your hunters and hunt for food in order to stay alive. The maps are procedurally generated every time, so no two rounds are the same. Put your survival instincts to the test!

Grim Dawn

The world of Grim Dawn is dark and rife

with war. The game is set in a war-torn place called Cairne and war has brought the human race to the brink of extinction. Now we know it seems like the plot to every other post-apocalyptic game out there but hear us out, it's the execution that matters. You know a game is done right when it feels fresh despite using age-old RPG elements. It sticks to the true-blue RPG format and pulls it off beautifully, if you're into a gory-gritty setting that is.

Darkest Dungeon

Darkest Dungeon is a more recent RPG and came out early this year. This 2D sidescroller RPG is about the psycho-

logical stresses of adventuring. You've got lead a party of four in a dark and gothic world where the biggest threat to them isn't just the enemies you face; various other factors come into play. The narration, the backstory, the amazing art style, the ambience, everything works together so incredibly well it's impossible not to get absorbed into the game. We're beginning to think maybe we should've made this an RPG lister instead, but fear not, the next titles are not RPGs.

Giana Sisters: Twisted Dreams

Giana Sisters: Twisted Dreams is a 2D platformer, however as mentioned in
