04 BOLT AUTO TECHNOLOGIES

Founded by Satyajeeet Mohanty and Ronak Kumar Samantra, Bolt takes the IoT approach and applies it to its flagship product – The Bolt Red

Streak. Made for avid bikers, the Bolt Red Streak is a compact mobile charger that is not only waterproof, but also theft-proof. In addition to charging mobile devices, the Bolt Red Streak also tracks rides through the accompanying Bolt Riders App. It is accompanied by the Bolt Pocket, a waterproof pouch for smartphones, that's also touchscreen friendly. Bolt is already clocking steady sales through both offline retailers and ecommerce websites like Flipkart and Amazon.

05 JUGNOO Jugnoo has been creating waves in startup circles for a while now, and it continues to grow with great promise. Founded by IIT alumni, Samar Singla and Chinmay Agarwal, this smart auto rickshaw aggregator found its

roots in Chandigarh, expanding to 30+ cities across India. Using the Jugnoo App, users can hail affordable auto rides at the tap of a button. It's genius because customers can save up to 32% or more, compared to a traditional auto ride.

06 AUGRAV Taking the 3D printing revolution to the next level, AuGrav tapped into India's obsession with precious metal jewellery, offering 3D printed customised designs. The startup works fast and has served more than 2000 customers via online, offline stores. Once a design is selected, customers receive a 3D model, after which AuGrav prints, polishes and hallmarks the jewellery. The final product is then parceled out through a secure, insured shipment. Moving forward, AuGrav is

looking to present customers with an Augmented Reality tool for product previews. The startup is also piloting a ring with an inbuilt NFC chip, to connect with smartphones and accomplish daily tasks. Founded by Vivek Krishna, an engineer by pedigree, AuGrav has been up and running for 2 years and counting. So if you are looking for that one of a kind LoTR ring, this is the place for you.

07 MYPPOOLIN Mypoolin is social and group payments startup that made it easy for Indians to split payments for anything from movie tickets, to hiking trips, parties, gifts and more. In addition, the MyPoolin app takes away takes away the social awkwardness of asking friends & family to return loans. Over time, MyPoolin tied up with other successful payment

startups such as PayTM, PayUMoney and Mobikwik. A success right off-the-bat, MyPoolin raised initial capital from the likes of Google India MD, Rajan Anandan. The startup is a dual effort by Delhiites Ankit Singh and Rohit Taneja, who managed to earn a revenue of ₹10 lakh, in the first four months of the app's launch.

08 MUKUNDA FOODS Imagine a perfectly rolled, crispy dosas, made effortlessly in seconds. With Mukunda Foods' Dosamatic, you get exactly that! Designed by two friends, Eshwar Vikas & Sudeep Sabat, Dosamatic is a machine that automatically rolls and dispenses dosas. Users can set their preferred dosa thickness and press a single button to get the process started. All you need to do is

feed the right ingredients into the machine. Dosamatic is now being used by a bunch of restaurants across Mumbai, Bengaluru, Kolkata and NCR. What's more? Even the Duke and Duchess of Cambridge, William and Kate, enjoyed Dosamatic's crispy offerings on their India visit. Sounds *Dosalicious*!

09 TRAK N TELL Think IoT solutions for cars and bikes, think Trak N Tell. A startup based out of Gurgaon, Trak N Tell recently secured funding from Brian Acton, Co-Founder of WhatsApp. Owing to the advancements in the Internet of Things, the startup aims at creating intelligent devices for Machine-to-Machine communications. The company's most recent product is a GPS device known as Intelli7. Intelli7 is manufactured in India and enables car owners to remotely track their vehicles. In case of theft, vehicles can even be immobilised remotely by simply tapping a button on the accompanying smartphone app. The app also relays vehicle
