

information, such as location, usage patterns, overspeeding alerts and more, to its customers via the startup's cloud infrastructure. Founded by Pranshu Gupta & Ritu Gupta, Trak N Tell products are already available in 100+ store shelves across Delhi and NCR, along with Flipkart and Amazon. Trak N Tell is also launching in Bengaluru soon.

10 HUG INNOVATIONS

Imagine if you could turn up the volume on your speakers, dim the room lights, play console games, switch presentation slides and fly drones, all with the help of your hand movements. With the new gesture control watch from Indian startup Hug Innovations, you can do just that, and a lot more. The Hug smartwatch is the brainchild of Founder &

CEO, Raj Neravati, who has more than 17 years of experience in the IT industry. The company has roots in the city of Hyderabad, while the headquarters are now based out of the US. The Hug smartwatch is up for pre-order right now.

11 TESSERACT IMAGING

No, this is not the ancient Asgardian infinity stone. Tesseract Imaging is a young and promising Indian startup which makes 360 degree Virtual Reality cameras, to map any room or

location in 3D. Its two flagship VR cameras include the Methane 360 and the more advanced ViCam. With the help of images captured by 360 VR cameras like Methane, users will be able to do virtual walkthrough of houses, rooms and other spaces, without having to visit them in person, while cameras like the ViCam are perfect for those professional 360 degree videos on Facebook. From the fabrication of the product in Marol, Mumbai to packaging in Dharavi, Mumbai – the largest slum colony in the world – these are thoroughly desi-bred 360 VR

cameras. Tesseract CEO & Founder, Kshitij Marwah, flaunts an MIT pedigree and is the brain behind Tesseract.

12 UNCANNY VISION

With its deep learning algorithms, Coimbatore-based tech startup, Uncanny Vision, is changing the way video surveillance is done. The smart sensors deployed by the startup in its surveillance systems are capable of not only capturing video, but also deciphering them intelligently. One such system is deployed in Coimbatore itself, where it is used to keep a check on Elephants crossing over into public areas. The system, equipped with a SIM card sends quick alerts to relevant authorities, in case of a breach event. Amongst its client list are 5 Fortune 500 companies and many more smaller enterprises. Uncanny was founded by Coimbatore residents – Navaneethan Sundaramoorthy and Ranjith Parakkal, and besides video surveillance, the

company also focuses its energies on robotics, Android apps and more.

13 FINDMYSTAY

Findmystay.com is a three year old hotel booking platform, founded by Rohit Khetrpal and Simran Sial in 2013. The platform enables its customers to book (and offer, for hoteliers) rooms at the price they wish to pay, through a reverse online bidding process. The startup has seen more than 1.5 lakh bids on its website till now, with customers saving upto a whopping 50 to 70 per cent on hotel room bookings. As per FindmyStay, the cheapest a 5-star that

has ever been booked on the website is for ₹1,900. The startup uses proprietary software and tools to map hotel inventory across India, with an aim to go global in the next 5 years.

14 FAIRCENT

FinTech startups are all the rage right now, and Faircent seems to be leading the rally when it comes to peer-to-peer lending. The platform helps people borrow and lend money, on their own, flexible terms.

Founded by Rajat Gandhi & Vinay Mathews, Faircent boasts of more than 13,000 registered borrowers and 2500+ lenders. Going forward, the startup is setting its sights high, with an aim to disburse ₹800 to ₹1,000 crores in the next 3-4 years.

15 EMPOWER LABS

Augmented Reality gaming is the next big wave and *Pokemon Go* has proven just that! Taking the idea of AR gaming forward, a fresh-off-the-block startup, Empower Labs, is designing its own AR offering – *DeltaT*. The startup has tied up with the creative team of the
