

massive hit *Baabubali* for the trailers and visual creatives of the game. *Delta T* will become India's first Augmented Reality

MMORPG (Massively Multiplayer Online Role Playing Game), the trailer of which has already seen more than 4 million views. The game beta will be available this month (August 2016), with an official launch slated for later this year.

16 REVV

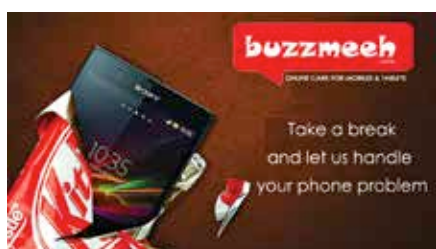

Smartphones and the internet have given many people a new source of livelihood. This is how two ex-McKinsey professionals, Anupam Agarwal and Karan Jain, started Revv. An app and web based car rental service, Revv helps people rent self-drive cars in a

matter of 2 minutes! Revv users can even book home pickups and drops for the cars they rent. Revv's business model is unique, as rentals do not include any excess kilometer charges or hidden costs. The Revv app is available for both iOS and Android users.

17 BUZZMEEH

One of the most common problems with owning a smartphone or tablets these days is the

lack of repair/service centers for the devices. With an aim to solve this very problem, Delhi-based Puneet Gupta, bootstrapped Buzzmeesh, a one-of-a-kind doorstep repair service that offer exceptionally punctual services. Buzzmeesh was conceived by Gupta after his newly purchased smartphone contracted a software glitch. So, how does it work? Customers with broken, damaged devices can contact Buzzmeesh, after which technicians collect them from the customers' homes. A standby device is also provided for the 24-hour repair period. In addition, the startup provides warranty on all its repairs. Founded in 2015, Buzzmeesh currently caters to Delhi-NCR, with an aim to expand its presence to the rest of India soon.

18 SWIGGY

Founded by Sriharsha Majety, Nandan Reddy and Rahul Jaimani, Swiggy is a foodtech startup, with over a million app downloads under

its belt. The startup works by delivering food collected from local restaurants in a user's neighbourhood. Since its inception, Swiggy has set a monthly growth rate of 25 per cent and now has over 5,000 restaurants on its platform. With deliveries now open in all major cities, Swiggy is just getting swaggier by the day!

19 LIVE BRAILLE

Navigating busy streets and crowded places is a herculean task for anyone, but, for those who are visually challenged, it is all the more difficult to steer through the complicated and busy environment surrounding us 24/7. Hopefully, a young entrepreneur from Chandigarh is going to change all that. The startup's first product, Live Braille Mini, is a travel guidance ring for

the visually challenged. Live Braille Mini uses ultrasonic sensing technology, combined with patent pending wave-tracing and intelligent measurement algorithms that precisely sense the direction, distance and texture of the object in the front. This information is then relayed to the user in the form of haptic feedback. Founded by Abhinav Verma, Live Braille has already tasted immense success with NGOs in India and overseas. The next generation of the Live Braille Mini will be capable of storing audio books, with 32GB of storage. Verma's startup is in talks with governments from various countries for this, in order to simplify life for the visually challenged.

20 EKINCARE

Having to keep a life's worth of health records in one place has always been a pain. But not anymore. eKincare is a Hyderabad based startup that uses cloud storage to file and maintain all your personal health records in one place. Users can upload medical records, which are then stored in a digital format on the eKincare platform. The platform also analyses health records to

provide users with a customised health plan to keep fit. The best part is that the eKincare platform is completely free to use and offers unlimited cloud storage to users. Founded by Kiran Kalakuntla, the company is expanding their online and offline reach across the country. **d**
