OUR PICK OF THE BEST TECH ARTICLES FROM AROUND THE GLOBE

(MUST READS)

SOCIAL MEDIA JOURNALISM

With social media already disrupting the news industry, technology has been serving several such tools in the hands of masses that enable them to share their opinions. But the more important questions here is, how much of it is actually true? Is technology to be blamed for the disruption of truth.

CURATING THE BEST MUSIC

Selecting what is 'good music' is definitely a challenge, especially here at the Digit office. The fight between 90's rock and the currently trending pop and EDM is never ending. Anyway, here's how professionals of the largest music streaming services curate and organise their playlists to suit your needs.

AI, WHO'S FAULT IS IT?

Deep learning is the key to better and efficient AI, but do we really know how these work? In case of a screw-up, how would we decipher who's at fault and who is to be blamed if we still don't know how algorithms make decisions! <http://dgit.in/FaultyAI>

Hey there, I'm using an IM

Instant Messaging platforms have become the backbone of communication in our lives. But while we're definitely dependant on them, do we realise to what extent these IMs track our conversations, user behaviour, and settings?

Can we have a 'safe' self-driving car?

On one hand, Google's self-driving cars cannot be controlled manually, even in an emergency. On the other hand, other non-Google self-driving cars have got into an accident not due to software, but human errors. How do we use these cars to make our lives easier then?
