

Corrigendum

In the August 2016 cover story 'University Watch', Precog is incorrectly said to be from IIT Delhi, when they're actually from IIIT Delhi. We apologize for the mistake.

New lithium metal

A new metal tech for ultra light car batteries and thinner phones

Inbox

cerned right now. But let me clarify, we readers too can get attention by inserting interesting subject lines (you see Ms. Adamya Sharma?).

Let me tell you guys, you do great work. It isn't easy being the No.1 Tech mag and staying at the top for more than 15 years. Criticizers exist only to help. When I started my blog it didn't show up in Google search results. I didn't know the value of SEO then but the criticizers pointed it out. Now I'm at the top for certain search terms. Some suggestions:

1. **Tape-Tape-Tape:** So much tape, when opening the pack sometimes we tear the mag.
2. **UI:** You have been bombarded with several mails demanding new UI for DVD but I have faith you will change it. The current one sucks.
3. **Sponsors:** I had been thinking of sending feedback since past few months but I was busy with my blog, studies, and the founding of IT club - Infinity - of which I'm the head. We need someone to sponsor our shirts. Can Digit?
4. **Quiz:** I am still waiting for the day Digit says "Quiz thee ask, Quiz shalt thee get".
5. **Game Engines:** The best game engine for creating games without coding other than Unity?
6. **Encyclopedia Technica:** PDFs link?
7. **Digit Squad:** I want to be a member of Digit Squad, how do I apply?
8. **YouTube downloading:** is it legal?
9. **Workshops:** Does Digit conduct workshops for schools?
10. **Test Center:** Can I have a visit with Infinity members to your test centers nearby Delhi?
In the end, you guys rock!!! Keep Digitizing... And replying to my mails:-)
Regards,

Sagar Khatri

Wow Sagar, great suggestions.
To join Digit Squad all you need to do is send in a well written article. That's it. Downloading YouTube videos is a violation of its terms of service. Sure, you can visit the Test Center, just give us a buzz and book a time slot. Lastly, I

LETTER OF THE MONTH

Remember me? Thank you so much for publishing my letter last month. You and your tech magazine are like my tech "devta". I bought your august issue late as my brother and sister have their exams at the moment. The three of us read every issue word-for-word. The August issue was great because of the following points:

1. Giving knowledge of Indian tech startups, celebrating our freedom/independence month.
2. A very good cover page. I have a question: can your fans can also design your cover page?
I collect Rs. 200

every month for your magazine. I have many questions:

1. Why do you provide game of low graphics and old game-play?
2. Do you test product by buying them or by something else?
3. Can you provide review of Harry Potter and the Cursed Child?
4. Can you provide 2 DVD- one for s/w and other for games?
5. What are the criteria for to be the letter of month (if this letter is letter of month I am too excited for my gift as it will be honour to take "vardhan" from tech "devta" like you) let me know.

Again thanks for being India's Technology Navigator.

-Deepak Kumar

Thank you for the words of encouragement Deepak. Of course we remember you.

1. There is a retro revival of sorts going on in the indie space and hence the "old style" games. Plus these games aren't very taxing even on low end systems.
2. Product manufacturers are kind enough to send us review samples. And before you ask the next question, YES we have to return them!
3. Many in the team have read it, and you can find out what we think of it in the Escape Unwind section.
4. We used to have two DVDs. If more people write in asking to bring back the second one, we'll consider it.
5. We pass every letter through our custom built scanning algorithm. It checks for sincerity, fandom, usefulness of suggestions, utility of constructive criticism and a secret parameter called the d-factor which is computed using processes we can't reveal. Your mail has made the cut though. Vardhan granted.

-Team Digit

can't believe you found me prettier than Adamya ;-)

-Siddharth

Hello Robert,

First of all, thank you for the demystify on Quantum Physics. However I would like to point out a mistake in it.

On page 33, under Rutherford's gold foil scattering experiment, you have mentioned that the expected result was that due to the plum pudding arrangement, alpha-particles should have rebounded and not penetrated the atom.

But in fact, the expectation was just the opposite! This was because, due to the plum pudding assumption, two major characteristics about the atom were inferred. First - the complete mass and positive charge would be distributed in complete atom. Second - due to this, the charge density as well as the mass density in the atom will be low.

Now, the alpha-particles have very high penetrating power. So it was expected that the lower charge density of the atom will not be sufficient to
