DROOL MAAL

Get your drool on and behold some of the fanciest, ostentatious and drop dead gorgeous things money can buy. Droolworthy?

BeoVision 14

Bang & Olufsen (B&O) is a popular brand known around the world for manufacturing premium quality audio products. But people are hardly aware of the company's lineup of televisions called the BeoVision. After going silent for a few years, they decided to revisit this category and launch the BeoVision 14 in order to cash in on the smart and 4k Ultra HD TV hype. It has an LCD panel with screen sizes available in two options – 40 and 55 inches. The brilliant design is a signature

aesthetic which is visible on most of their products, and here they have gone for a combination of oak wood, fabric, plastic, glass and aluminium. As for placement preferences, you can have it on a stand, on the floor, or on the wall (looking like a masterpiece). Already known for their prowess in building audio systems, the speakers on the front of the TV also consist of a bass unit and you'll be able to pick a colour from among a few options. It's an Android TV essentially, where the screen comes with an automatic screen control sensor to adjust the picture quality based on the incident light. Inside the box, you'll also get the BeoRemote which can interact with the TV using both Bluetooth and IR commands. Being a premium product, the 40-inch variant of the BeoVision 14 costs about ₹4.5 lakh.

Evo-43

We've covered numerous yachts ranging from the most expensive ones to the most futuristic ones. Although yachts nowadays have been installed with the latest technology, the Evo-43 expands the scope of being innovative with tech. There's no doubt that it looks like one of those space ships you see in sci-fi movies, the yacht can transform in order to get more space on the deck. At first glance it appears to be a regular yacht with seating in the middle. But once the cockpit is moved, it expands from the default 14.8 feet width to 20.7 feet to accommodate more people. The cockpit consists of the wheel, control panel and all the navigation and monitoring systems. The adjacent area of the cockpit is modular so it expands into the dining table and bar platform. The "beach area" as they call it, can be transformed

with a single button and in seconds you'll have the extended platform to yourself. The extension is made possible with the help of the XTension's hydraulic system that transforms the space in under thirty seconds. The yacht also houses a sliding door leading to the lower deck that consists of another dinner table which

can be folded and turned into a spacious double bed. Going further inside, you'll come across double cabins and the baggage counter. The ₹5 crore yacht is available in three engine variants ranging from 870 HP to 1100 HP, pushing it to a maximum speed of 38 knots and cruising speed of 30 knots, with a range of 300 nautical miles.
