OUR PICK OF THE BEST TECH ARTICLES FROM AROUND THE GLOBE

(MUST READS)

5 YEARS AT APPLE

Lately, it's been a hard time for the guys at Apple to maintain the sales numbers. On completion of five years at Apple, Tim Cook shares his experience along with Apple's future strategies to improve these numbers and upcoming projects in this extensive interview. <http://dgit.in/TCIntvw>

SMART HOME ASSISTANT

There's been a lot of activity in the smart home arena, led by various tech giants including Google, Amazon, Apple, etc. But when we sit down to compare, which one of these giants mark all the checkboxes and have the potential to build the controller of your future smart home? <http://dgit.in/SHASstnt>

UNBIASED JUDGES

When Algorithms can be used to understand and predict exactly what we want, why can't they also be used to predict upcoming risks and maybe suggest measures to eliminate it. <http://dgit.in/CrimAlgo>

MAKE UP YOUR MIND

Having a switchable navigation bar on an Android phone seems to be a decent idea, till we realise how much space is wasted on those dedicated hardware buttons. <http://dgit.in/AndNBtn>

DARK PATTERNS OF THE SURFACE WEB

Sure, there are UX designers that are dumbing down website interfaces to complete an action in minimal clicks, but along with the good, there also exist various websites that are using shades of grey, billing you via deceptive practices. <http://dgit.in/DrkPtrn>

Long live the DBA!

If you thought Database Administrators were dead or just catered to particularly large scale enterprises, here's the time to re-think. With the onset of data mining and analysis, Database Administrators are more important now, than ever. <http://dgit.in/LngLvDBA>

Extra secure Copperhead OS

Thought your Android OS was secure, especially with those regular OS updates and patches it receives? Guess, it is time to re-think. A two-man startup is working to clean-up Android's security mess that even Google has seen adopting, with their Copperhead OS. <http://dgit.in/CprhdOS>

No Man's Sky Review

The much anticipated game might not have received as great reviews as it was expecting, but on the other hand, no other game can beat this one when it comes to in-game photography. Here's more about the gameplay and the amazing engine it is built on. <http://dgit.in/NMSRevw>
