Mobile technology is changing at a tremendous pace and the budget segment is affected the most by it, allowing it to sport features like 3GB RAM, finger-print scanners, 1080p display and even 16MP cameras. You name it, these phones have it.

Further, the budget segment has become the most competitive market in recent times and that means consumers like us get a lot of options to choose from.

To find out how they fare, we picked all the popular and best budget phones in the market and put them head to head. Out of those we further filtered 10 phones, which fall in the ₹7,000 to ₹11,000

price band. We chose this range as we believe this to be the most important price segment in the smartphone market. Moreover, if you are about to buy a phone in India, chances are your budget lies in the same segment.

We considered all possible use cases and via thorough testing, we were able to find out a clear winner.

This will not only help you narrow down your options but also help you to buy the right device according to your needs. So, without any further ado, let's begin.

HUAWEI HONOR 5C

The Honor 5C is a good smartphone that gets a lot of things right. It rocks a similar design as the Honor 5X, but the design has now been tweaked to be
