

SAVING MONEY WHILE SHOPPING ONLINE

E-commerce websites have dynamic pricing, so it's always safe to assume that the price you see now can drop in the future. Not just on e-commerce websites, even mobile app stores have discounts frequently. Wouldn't it be convenient if there was a way you could be notified about these deals and price drops as soon as they go live? And how useful would it be to track the price of a product in the past to determine whether this is the best price and the best time? With the following tips, we'll tell you how to keep an eye out for these deals and how to save money by making the right choice while shopping online. Whereas for the gamers out there, the final few tips are dedicated to help you find, buy (free ones as well) and play more games.

Creating wishlists

We all have a wishlist of products that we want to buy, and the popular e-commerce websites help us in having them stored in one single place on their website. Not one single place across them, because we want to take advantage of the best price offered by any of these websites, so we create a wishlist on each one of them. Assuming that you're already signed in, you can create multiple wishlists on Amazon from Your Lists > Create a Wish List. The process is similar for eBay, Flipkart and Snapdeal. Use the following tips while keeping a regular check on your wishlist.

Setting price drop alerts

Creating wishlists is quite an effective method to keep

track of the products you want. But it requires you to manually look them up frequently. If you're short on time in buying a certain product, a more effective way would be setting price drop alerts on

every e-commerce website. Websites such as Cheapass.in, Price & Alert and Pricetrak, monitor price drops on e-commerce websites including Amazon, Flipkart, Snapdeal, PayTM, etc. To set an alert for

Track the price of a product you want

Buyhatke helps you find coupons while you sit back and relax

Seller	Seller Rating	Shipping	Price	Details
amazon	★★★★★	Shipping FREE 4-6 Business Days	Rs. 11,999	Shop Now
Flipkart	★★★★★	Shipping FREE 2-3 Business Days	Rs. 11,999	Shop Now
TATA CLIQ	★★★★☆	Shipping FREE 2 Business Days	Rs. 11,999	Shop Now
ebay.in	★★★★★	Shipping FREE 4-7 Business Days	Rs. 13,298	Shop Now
snapdeal	★★★★☆	Out of Stock	Rs. 11,999	Out of Stock

Price comparison across e-commerce sites is very useful

the product you're looking for, all you need to do is enter the URL of the product and your email address, and whenever there's a price drop, you'll be sent an email notification.

Searching for coupons and vouchers

Right from electronic products to burgers, there are several coupon aggregators offering discounts and free stuff. The popular ones include CouponDunia, Couponraja and GrabOn, where the first two also have mobile apps. You can search for the corresponding coupons on their websites based on the e-commerce site you plan on buying. Another effective way is to use a browser extension called Buyhatke. When you're making the final payment online, the extension will search and apply the best coupon it comes across, making it a really handy tool.

Using price aggregators

Shopping online is all about getting the lowest price from a trusted marketplace. Comparing the prices manually can be a tedious job leading to multiple open tabs on your browser. Take advantage of aggregators that list down the prices of products from almost all the online marketplaces, even the obscure ones if you're brave enough. You can check out websites like MySmartPrice, PriceBaba, PriceDekho, Smartprix, etc., that not only create price comparison lists but you'll be able to even score rewards and discounts if you choose to buy using their affiliate codes.

Monitoring price history

Dynamic pricing on e-commerce websites makes it unre-
