1TB SD Card

Sandisk has unveiled a prototype of its new SD Card that comes with a capacity of 1TB! <http://dgit.in/SD1TB>

Workshop

you can either upload a photo from your PC, directly search it only from the embedded search, or choose from Lightroom, Dropbox, or Google Photos. Once the photo is uploaded, it will be applied to your canvas. Under the Photos tab, you have more options to scale and rotate the photo. Unfortunately, there is no reset button to revert your modifications. Furthermore, you can also add Photo Filters to the background image, although with limited options.

2. **Color** - Under Color, a colour palette will be presented with copious

Select the text and use the handles to scale or rotate the text

colours to choose from. Once you select a colour, you'll be warned with a pop-up saying "Applying colour will remove your photo". Hit "Apply" to continue.

Text - The text option has lot of customisations to choose. The panel at the right will display various tools to alter the text. These tools include,

1. **Edit** - Select the edit tool if you want to change the content of the text displayed. Hit "Edit" > type new text > Save.
2. **Add text** - Additional texts can be added using this tool. Click on "Add text" > enter your text > Save. The second text will appear on the canvas. You can resize or scale it by selecting it and scaling it using the handles around it.
3. **Delete** - To delete a text, select the text by click on it > click the "Delete" button > Delete. Unfortunately, there is no undo option.
4. **Style suggestions** - A circular slider at the middle of the panel allows you

to choose pre-defined text styles. Select the text you want to change the style of > slide the slider > Save.

5. **Shapes** - It allows you to add cool geometric shapes, banners, decorative ribbons, and social media icons behind the text. Select the text you want to add shape to, click on "Shape" > select a shape > Resize the text accordingly > Save.
6. **Colors** - The text colour can be changed according to the background using Colors. Select the text you want to change the colour of, click on "Color" > select a colour > Save.

7. **Fonts** - Select the text you want to change the font, click on "Font" > choose a font > Save. The font collection is impressive as there are lot of cool fonts to choose for every occasion.

8. **Spacing** - With spacing you can change the line spacing between the texts.

To change it, repeatedly click the Spacing button.

9. **Align** - As the name says, it aligns the text to left align, right align, or center.
10. **Opacity** - To make your text look transparent you can change the opacity. Select the text you want to change the opacity of, click on "Opacity" > slide the slider to change the opacity.
Once you think you are done with the poster, click on the "Share" button located at the center of the top nav bar. A new window will emerge where you can download the image as ".jpg" or create a direct link to share with friends on the social network. All your creations are automatically saved on the Adobe Cloud, so if you want to change the poster at a later point

in time, you can find your project under "My Projects".

Create an Adobe Spark Page

With Adobe Page you can create web stories for photo journals, event recaps, portfolios, catalogs, etc. Once you select the page option, you'll be redirected to the page canvas. Start by adding title and a subtitle to your photo journal. To make it look better add a background photo by clicking on the photo button located right below the title of your journal. After the landing page is created, scroll down to add more pages to your story. You'll be presented with options to add photo, text, button, video, photo grid, or a slideshow.

1. **Adding Photo** - Selecting "Photo" will land you to the usual photo selection panel, where you can either upload photo from your PC or from the web. After the photo is uploaded, you'll have different options to select the photo appearance, such as - Inline, fill screen, window, full width, replace, and delete. Additionally, there's a small text box for the caption below the newly added photo saying "Add caption".
2. **Adding Text** - To add more pages, click on the small "+" located below your page. To add text, select the "Text" option. A cursor will appear where you can write your text. Format it using the toolbar appearing right about the text.
3. **Adding Button** - As a part of the next page, you can also add a button, that will act as a hyperlink that will redirect the viewer to a new page.

As the photo uploads, choose the photo alignment from the options offered.
