

DGT

All the latest lifestyle technology, gadgets to drool over and gizmo porn like never before. Desire, Greed and Temptation ahead...

**Angular 2.0 released**

Google has finally released the Angular 2.0, incompatible with the older version. <http://dgit.in/Angulr2>

✉ Hello there! I've been reading your magazine for the past year and the magazine is very awesome. The 'Become A Hacker' issue was very cool. I've learnt many techniques from it and I might try 'em out (not on you guys!). The article on other popular hackers was something that I admired. Happy Birthday Joshi virus story was funny! Anyway, this month's SKOAR! was awesome! The article on Devil May Cry was the best. I want to ask you a question: Do you know about Hatsune Miku? If yes, can you give a FastTrack about the vocaloid? In the end, thank you guys for inventing such a cool magazine.

—Shivam Shekhar Soy

📌 Thanks for the feedback Shivam. We're glad that you liked the September issue. But a FastTrack about Hatsune Miku? Are you serious? Looks like someone's got a little crush :-)

—Siddharth

✉ I am 13 and I have started reading your Digit magazine recently and IT IS AWESOME! Your YouTube channel has improved a lot. Just some suggestions-

1. Increase product reviews as they are loved more by the audience.
2. Please provide better games in the disc as they are a little boring.
3. Keep more tech articles. The ones like Human 2.0 and Trolling can be a little boring.
4. Please provide DIY articles and interesting projects that are really awesome! (I really liked the How to repurpose old tech! In the 15th anniversary issue).

Robert sir told me that you guys have an office in Mumbai eh? I can give you a visit anytime as I live in Pune! You guys feel like a family to me!

P.S. Can you please answer what is the salary of a Digitian? Thank you for inspiring me and millions of fans and taking them to the Tech World!

—The Prefecttaps

📌 Good suggestions! Yes we have an office in Mumbai. Sure you can give us

Feedback for the September 2016 issue of Digit

a visit. Be sure to give us a shout before coming. As for the salary question, the answer is "not enough".

—Siddharth

✉ Greetings, Team Digit!

First of all I would tell you what countless others have already said, but is very true – that you are doing an amazing job. Digit is not only the best tech magazine in India, but in the entire world (at least from my point of view). I discovered it in class 6th and have always read it whichever issue I find, wherever I find.

Having said that, I have gripes about your website. I use the site to stay connected with you, and visit it daily. However, it seems to be extraordinarily cluttered and disorganised (either that or I am missing the system of organisation). Often it has happened that one month old articles are at the top, while the newest articles and news are somewhere down below, to be found after much scrolling and carefully looking at the date of publishing.

Something that has been worrying me lately is how the PC is being neglected for the last 3-4 years or so. We see cheap, 10-15K smartphones boasting 2K displays, while even today

a 55K laptop runs at mere HD 720p. "Budget" phones are getting shiny new deca-core processors, 3 GB DDR4 RAM, while mid-range PCs run at 4 GB DDR3 and barely a quad-core. Why should we have to spend a bombshell for a good experience, while extremely powerful smartphones are being made available at a price barely a fraction of a top-end gaming PC. Agreed, that PCs are more powerful, but why are no attempts being made to make PC tech affordable and compact? Why should a thin laptop be labelled as an ultrabook? At this point, every laptop should have been an "ultrabook". Maybe I have lesser knowledge and understanding about how R&D works, but still it seems unfair. Even today the PCs have crap webcams, crap in-built microphones, and crappy speakers. It is really sad to see the most productive tech we have being neglected like this, and it pains me greatly. I would love to hear your views about this topic.

—Hritvik Kaushik

📌 Thanks for your mail, and continued support to our magazine that we all love, Kaushik.

Your feedback on the website's been received, loud and clear, and let me tell
