

GREED

DROOL MAAL

Get your drool on and behold some of the fanciest, ostentatious and drop dead gorgeous things money can buy. Droolworthy?

Peugeot eU01s Electric Bicycle

The Peugeot eU01s is an electric bicycle which can go at a whopping 45 km/h, which is much faster than the traditional 25 km/h electric bicycles and scooters out there. The eU01s falls under the moped category. So you're definitely going to need insurance, registration and a helmet. Safety first! 45 km/h is not a joke. The eU01s comes with a BOSCH Performance Line electric motor which, with a 400-500 Wh lithium-ion battery, can give you 75 to 95 kilometres on a single complete charge. The electric cycle also has 180 mm hydraulic disk brakes and a maintenance free belt transmission. The eU01s also has the option for an onboard computer, with a 4.3-inch screen. Through this you can manage pedal assistance, and make use of several other functions available on the computer such as 3D navigation, coaching, and smartphone connectivity. The Peugeot eU01s will be launching later this year in December. So if you were planning an advance new year resolution to go cycling, here's the perfect ride for that.

Hermes Apple Watch

Most smartwatches we come across don't really excel in the looks department. But Apple and Hermes have come together to create a watch to compete with the best of them when it comes to looks. The collection this year is expanding to include more colours and designs.

The additions will include a new design called the Double Buckle Cuff, inspired from a Hermes sandal design. Well, it doesn't matter what it's inspired by if it looks good right?

The Single Tour and Double Tour styles are also making a return with new colour options. The strap styles come with the Apple Watch Series 2, which features GPS, a brighter display, and a powerful dual-core processor. These watches will be up for grabs in two different case sizes: 38mm and 42mm; starting at \$1149 for the 38mm Single Tour and \$1199 for the 42mm Single Tour.

Sealine F530

Sealine's newest flybridge yacht, the F530, is their largest yet, and the luxury boat is powered by the Volvo Penta IPS. Sealine have stayed true to their ethos of combining style with practical design. The 53 foot vessel is both spacious and provides exceptional performance thanks to the installation of Volvo Penta's IPS system. The F530 comes with three cabins and a mechanism at the helm seat which allows it to pivot backwards and be used as a chaise longue (one of those fancy looking sofas that have a backrest only at one end). The F530 is available with Volvo Penta's 8-liter diesel engine and three propulsion system choices. It's also equipped their Electronic Vessel Control (EVC) for boat function management and gives a top speed of 31 knots. So time to pull that anchor up and go for a little voyage!
