

Vertu Signature Touch Alligator Collection

When you think luxury handmade mobile phones, the first name that comes to mind is Vertu. This time they've brought us the all new alligator collection, as a part of their Signature touch smartphones. Vertu's Signature touch series are arguably of the highest quality on the planet and that may be understating it, so for something to be a part of that is pretty phenomenal and the alligator collection seems to fit the bill. The alligator collection has been specially crafted by a French tannery and comes in five variants: Jet Alligator, Pure Navy Alligator, Clous De Paris Alligator, Almond Alligator and Cocoa Alligator. Each of these pieces come with a 130 carat sapphire crystal screen, brushed and polished titanium coated sides and a hardened black ceramic pillow. Each Vertu device is carefully curated and specially crafted so one may be slightly different from the other.

Gold plated Sony Walkman

The new NWM1Z Sony Walkman was revealed at IFA in Berlin this year and it's in a gold-plated casing. This \$3200 device is an upscale on last year's model, with modifications to the software for the optimum listening experience and minimum audio interference. It's got slightly more bulging buttons for easier pressing and a headphone jack right on top of it, much more convenient in our opinion. The Walkman not only looks like a million bucks, it's also resistant to oxidation and has reduced contact resistance. The new series features separate digital and analog circuitry and tech that can upscale low bit-rate files to a "near high resolution quality". There is of course a standard version for \$1200. There's some very minute differences between the two variants, something only a true audiophile would be able to decipher.

SOMETHING EXCITING THIS WAY COMES

The Digit e-mag app is now listed on app stores

It's still in beta though. We're perfectionists and want to make the app even better before the "official launch".
