Bentley Flying Spur W12 S

The new Bentley Flying Spur W12 S has the distinction of being the fastest four-door Bentley yet, with a top speed of 202 mph. The Flying Spur W12 S can go from 0-100 km/h in just 4.2 seconds, thanks to its 6.0-litre hand-built engine which delivers 626 horsepower and 605 lb/ft of torque. This along with a new suspension setting ensures dynamic handling for every situation without compromising

the Bentley driving experience. The new edition of the spur features several changes to its exteriors, making use of a much darker style setting. The W12 S comes with a Beluga gloss radiator grille and light surrounds, a rear diffuser, and an optional carbon fibre veneer. Widely known for being makers of the finest luxury sedans in the world, you can be sure to expect luxury oozing out from every inch this car. Its sporty exteriors are well matched by its hand-crafted interiors and clients have the option to choose from a variety of materials and stitching options. Bentley has not yet released any pricing for the 2017 Flying Spur W12 S, but deliveries are expected to start near the end of this year.

Tesla S P100D

Tesla's new Model S P100D comes with an increase in performance in addition to improved battery capacity. The P100D offers greater range than the existing P90D and Tesla also claims that the P100D can go from 0-60mph in 2.5 seconds. According to Tesla, that figure makes it the quickest accelerating production car in the world. For a car that weighs 2.1 tons and can seat up to seven people, that's very impressive. The new battery which is now at 100kWh puts the official NEDC range at 380 miles (611 km). The more realistic America EPA gives it 315 miles (507 km), which puts it at about par with most regular combustion vehicles, which is again, very impressive and

a good 45 miles (72 km) greater than the P90D. The Tesla P100D is expected to cost around \$134,500 but it isn't confirmed yet. Owners of the P90D in America can upgrade to

the P100D for \$10,000 (₹670,000). Prices for the SP100D have not been confirmed in the UK either, but you can expect it cost around £15,000 (₹1,300,000 approx) to upgrade.
