India's startup scenario is at an all time high. There is no dearth of incubators and accelerators in the country and even big corporations and established companies are starting their own startup programs in India. Not only does this benefit the budding entrepreneurs of the country, it also benefits bigger companies who can harness the potential of the alternative thinking and problem solving approach that startups make use of. For example, Barclays Rise Mumbai is an innovation platform for fintech startups that Barclays and other investors of the program will benefit from.

While a completely exhaustive list of all the successful accelerators and their active alumni will probably be too long a read, we've created a list of some of the most notable and unique accelerators and incubators in India, along with their now famous graduates.

Startup Village

This startup incubator was started in April 2012 as a joint partnership with the Government of India through the Department of Science and Technology, Technopark TBI and MobME Wireless. It offers long term support until the startup gets funded. Some of the most significant startups

funded by the Startup Village are Fin Robotics and SYM. Fin Robotics was the youngest speaker at MWC 2013, Barcelona and also one of the top 15 startups from across the world in the CES'14 TechCrunch Hardware Battlefield.

The way it works is that anyone with a startup idea can register on their web-
