

Google Maps update

After the recent update, you can use Google Maps to spot traffic jams near you in real time with its 'Traffic nearby' <http://dgit.in/GoogMpsUp>

Razer acquires THX

Audio-visual legend THX has been acquired by Razer in an undisclosed deal. <http://dgit.in/RazrTHX>

Feature

site for ₹1000/-. You essentially register as a Founder and add your co-founders. After that you're given a coding and video task. Based on your performance in that, you're called for an interview. Post this your startup gets enrolled into what they call a "course", which costs ₹37,500/- per founder. Enrolment into the "course" gives you access to a number of scholarships and initiatives that aim to help students from their side, most notably the Start In College initiative. It is a free online course that tells you why and how to build startups even while you are in college. Under this initiative, they have partnered with 233 universities and provide 20 scholarships from Paytm for students from a low income background.

Microsoft Accelerator

This global program was one of the first to set up an accelerator in Bangalore. And since then, it has funded multiple successful startups like

Altizon, BabyChakra, DailyRounds, Healthify, Voonik and Zoom Car. With a team of 32 direct mentors, each of them industry experts in their own fields, this accelerator picks a batch of startups every year. Till now, 83 startups have graduated out of it, with an average funding of about \$1Mn. Their track record is very good with almost 76% of accelerated startups being funded.

One of the best programs available under the Microsoft accelerator is BizSpark. Under this program, a startup gets 3 years of free software, services, tech support and Azure cloud. The qualification criteria for this one

is – the startup has to be less than 5 years old, should be privately owned and should not be making more than \$1M annually. The best part – at the end of three years, the startup gets to keep the downloaded software at no additional cost. The Azure cloud services available are by themselves worth \$750 per month.

Acceler8 from Microsoft Accelerator is an umbrella initiative, which creates a single window process for startups to apply for various programs under Microsoft and its partners. Any tech startup is eligible to apply, even one with just an idea. There is no associated fees involved.

GSF India

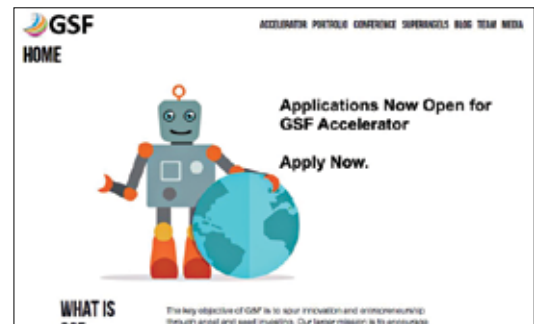

Operated by former Reliance Entertainment President Rajesh Sawhney,

GSF India is a 13 week programme shaped like a hackathon. During this duration, products sometime change drastically compared to what they started off as. It is a workshop oriented program that focuses on having a sufficiently clear idea by the end of it. Some successful startups that have come out of this program

are RentOnGo, NewsBytes, AirStream, Flintio and HackerEarth. One of their first batch members, Little Eye Labs was acquired by Facebook in 2014.

They have a 10 week 'super-accelerator' program modelled around hackathons that pushes startups to their limits. Startups attend 20 intensive workshops in fields like Product Strategy, Marketing, Technology, Business Strategy and Venture Funding. In terms of funding, GSF India invests about \$30k-\$60k at 8-9% equity into the startups inducted into the Global

Accelerator program. GSF also does follow-on rounds of up to \$500,000 into a few select startups after the program. They also have a school level initiative called GSF HighSchoolGeeks

aimed at fostering entrepreneurship talent among high school students in India. It selects 4 high school EiRs (Entrepreneur in Residence) who join a team of other EiRs from across the world, which includes graduates from the top academic institutions and founders of multiple successful startups. While the applications for GSF India 2016 are now closed since July 2016 and this year's accelerator program has already started in August 2016, the application program is available on their website every year.

Tlabs

An initiative from the Times Group, this accelerator has a very good track record. With more than 50 total startups having emerged out of it, out of which 85% are active, they take the support beyond accelerating stage and maintain it through the seed and growth stage. They have a standard investment plan of 30L for 8% equity in the startup. Startups like Inshorts,
