

Samsung's new 10nm SoC

Samsung has started mass production of SoCs based on its 10nm process nodes, claiming to be the first ones to do so. <http://dgit.in/SmsngSoC>

FB Messenger topics

Facebook Messenger might be experimenting with "conversation topics", providing possible topics to discuss. <http://dgit.in/FBMtopics>

Vidooly, Pratilipi, Mobapper, Viraliti and LetsVenture are some of their most successful alumni.

Their program is 4 months long and has more than 100 mentors participating in it. These mentors range from industry experts to startup founders themselves, from varying areas across Marketing, online media analytics, ecommerce and more. To apply, you need to go to their website and apply to the accelerator program, which needs you to fill a detailed form with no additional fees involved. Startups are selected at the discretion of Tlabs.

Venture Nursery

Venture Nursery is one of the accelerators in India that is backed by Angel Investors. It was established in March

2012 by Shravan Shroff, Founder and former MD, Fame Cinemas and Ravi Kiran, former CEO-South East & South Asia, Starcom MediaVest Group with its base of operations in Mumbai. They run a 13 week acceleration program and a ParallelTrack program. Some of their successful graduates are Oyo Rooms, Klip.in, Catapoolt and InvenZone.

Their accelerator program provides startups with physical space at no cost, much like most other such programs. Including last year's batch, their accelerated startups tally goes up to 21, with 12 of them still active. One of its Alumni companies, SeekSherpa, was the only Indian company in 2015 selected for the Google for Entrepreneurs Exchange in Astrolabs Dubai. Like most other accelerators, the emphasis for the selection is on the quality of the idea and the vision. To apply head to their website and fill

out the application form explaining your idea and plan. Also, if you are an established startup with a working prototype, you can apply for the ParallelTrack program for the same benefits.

Zone Startups

Zone Startups India is a collaboration between BSE Institute (a subsidiary of the Bombay Stock Exchange), Ryerson University's Digital Media Zone (incubator), Ryerson Futures Inc and Simon Fraser University, British Columbia, Canada. Located in the Bombay Stock Exchange tower in Mumbai, Zone Startups currently hosts 60 startups. It offers a state of the art

work space, mentorship in the form of a functional, business experts and industry panel, market development and business development support, networking & branding opportunities, funding opportunity, north American market access and peer-to-peer mentoring. Some of the successful startups to come out of this

incubator are Curofy, Fractal Media, and Force analytics.

While they haven't clearly stated a selection criteria, something that syncs with the rest of the startups already there is a bonus. They also have a special program called the India Market Access Program. Under this program, an international technology company looking to set up its first office in India will be provided end to end services for the same, which include plug and play infrastructure, local industry expert mentors, professional and administrative services for establishing an India business, corporate connections for customer development and more.

EduGild

Compared to the other ones on this list, EduGild is younger and more specialised. Launched in June 2015, it is an initiative by Maharashtra Institute of Technology (MIT) Pune. It offers a 16-week intensive mentorship and product realization program to any EdTech start-up in the world. In its first year, the programme received applications from 300 entrepreneurs focused on the education sector from all over India. Of these, EduGild has selected four companies for its accelerator programme. This year, they have short-listed 7 startups, which include 2 from USA and one from Russia. Last year's graduates are Classboat, InstafeeZ, Simulanis and Gradopedia.

EduGild's partners include CISCO, Cambridge University Press, Tata Class Edge, CodersTrust, Upgrad, Aptech, VIT Vellore, Indira Group of Institutes, and the MIT Institute of Design. Their selection criteria

mandates that the startup should have a product prototype ready or be in the initial stages of revenue. And to be selected, you also need to fill out an application form on their website.
