

GREED

EXAMINED

Some very cool products come to the Digit Test Centre which don't really fit into the standard product categories that we review in the Bazaar section. We write about them here mostly to make you turn green with envy.

Osim uSqueez Air

The most adored product to grace our test labs

Yes, you've read that right. Our test labs have seen some amazing gadgets, right from expensive bikes to dangerous tasers. And it takes an extra edge to be knighted as the most adored inanimate object in the lab. This is the first time we received such a product and literally everyone took turns to try their hand out, or rather feet. Osim sent us their high-end foot massager that de-stresses your legs using a combination of air

pouches and a roller. The air pouches are distributed into three configurations – calves, ankle/heel and the entire foot. There's a roller at the bottom that rotates to massage your sole (read: soul). Five different modes or presets automatically take care of your legs, which feels like multiple hands pampering you, directed to different scenarios including Reflexology, Energise, High-heels, Relax and Sleep. The massager also includes manual control, so you'll be able to individually operate the air pouches and/or roller. Both the air pouch and roller have a gentle and strong mode, where the gentle mode is intended for a comfortable massage while the strong mode goes Chuck Norris on your leg muscles to get rid of stress and tiredness. By routine, work at the labs now begin with a massage, the smiles evidently showing how effective they have been, Energise being our top favourite. The uSqueez Air is priced at ₹36,000.

Blue Pure 211

An air purifier even your granny can use

We've been receiving many air purifiers lately, and this has to be the easiest one we've used so far. With just one button to interact, your kids or maybe even your pet (if trained properly) will be able to control your air purifier. The Blue has a sleek design so that it blends well with your living room rather than looking like an ugly rectangular box. The Pure 211 is capable of covering a room size of 540 sq. ft. and if you have a larger area, you could go for the bigger variant – Pure 121. The replaceable fabric filters on the front not only make the purifier look good but also act as a pre-filter. These filters are washable and available in five different colours – blue, yellow, pink, light gray and dark gray, so feel free to match your purifier with

your living room's colour scheme. And in case you happen to change the colour scheme later, these filters are interchangeable. The fan on the top makes 360-degree air intake possible and most of the bigger particulate pollutants

are caught in the fabric. Removing the inner filter isn't difficult with the single-click mechanism. The single button lets you cycle through three different fan speeds. You can have the Blue Pure 211 purify your house at a price of ₹22,900.
