

**8GB of RAM!**

Samsung has unveiled an 8GB LPDDR4 DRAM module for phones
<http://dgit.in/Ssg8GBRam>

**Unfair treatment**

Seems Samsung's only retrieving burnt Note 7 samples, and not paying for fire damage

MORE 100% CROP IMAGES

The following 100% cropped image samples exhibit the tone of the sky to show the difference in the white balance and colours of the photographs shot by each smartphone. The Apple iPhone 7 Plus, as is evident, shoots photographs closer to the real image source, leading the pack in one crucial aspect of photography - originality of colour tone.
