

Mithun “Barbarian_Monkey” Mohandas
Witcher 3 : Blood and Wine | Platform - PC

Everything about Witcher 3, from its compelling storyline to the plethora of intriguing side missions are exactly what most open world RPGs should aspire to incorporate. And let's not forget Gwent! Has there ever been a time when a mini-game rivalled the larger game in repute? I think not! CD Projekt RED will have to try real hard to best this little masterpiece of a game.

Siddharth “staticsid” Parwatay
ARK: Survival Evolved | Platform - PC

Being so much of a mischief monger in real life, I've always suspected that I have a bit of a megalomaniacal side to myself. This game let me unleash it to the fullest from the comforts of my living room – without any risks of retribution. I helped build civilisations and I single handedly took them down as well. The game is a survival game at heart but the mere fact that you get to ride dinos is worth the thrill of giving it a shot. The game will suck you in. The game will consume you. Until like me, you'll join a tribe, meet another dude on a power trip, get pissed off and from the inside destroy his entire base, unclaim his dinos and essentially render months of his in-game hard work to the ground. Ahh good times.

Abhijit “babumoshaye” Dey
DOOM | Platform - PC

For me, it has to be DOOM, hands down. It's been a really long time since I enjoyed an FPS game to such an extent that made me forget the passage of time. All night gaming sessions became a norm. There was also a bias for nostalgic reasons but that only pushed me to play the game in the first place. Extremely fast-paced, bloody and gory, a bad-ass soundtrack from Mick Gordon, impressive level, weapon and character design, everything harmoniously converges to give you the best game of the year 2016. Pulling demon heads apart with your bare hands? Feeding a demon its own heart? Get right in!

Hardik “fluffyVader” Singh
Rise of the Tomb Raider
 Platform - PC

Quite simply because it's tomb raider. The game might have lousy AI, but it has one of the best graphics I've come across this year and a good storyline.

Arnab “knidarius” Mukherjee
Pokémon Go | Platform - Android

First of all, we all know this one broke records, right? Numbers apart, this one game single-handedly made all of us realise that AR has finally arrived! Although early on I did rant against it, but in retrospect that might've been due to my crappy smartphone. Even if you ignore the nostalgic advantage that the idea had to begin with, the sheer ingenuity in the way it was implemented is commendable. It brought everyone's, including my own hidden Pokemon trainer out and suddenly everyone was either team red, blue or yellow! While the game is still not in India officially (way to go Niantic!), that didn't stop me from enjoying my Pokemon catching spree, coz, you know, you gotta catch em all!
