TEMPTATION

If you're wondering what to do with yourself or how to spend some time getting cultured, this section is for you...

THIS MONTH: Movie: Doctor Strange, Book: Aurora and upcoming stuff to watch out for...

DESIRE > SHOWCASE

Cubetto

At first glance the Cubetto looks like a simple cutesy wooden block for your toddler to mess around with, but upon closer inspection you will notice that there's much more to it than meets the eye. This little wooden robot can teach your child the basics of programming. Cubetto comes with coding blocks, which represent actions, which the child combines to create programs for Cubetto. You simply place the blocks on the board, hit the blue button and watch Cubetto execute your program!

DJI Phantom 4 Pro Drone

There's a pro in the sky

Chinese drone maker DJI's latest drone is the Phantom 4 Pro, an update to the Phantom 4 which released earlier this year in March. Of course the Pro tag isn't just for show, it comes with a better camera, greater battery life, and several more flight modes. The Phantom 4 Pro has also got better and more advanced obstacle avoidance in comparison to the Phantom 4. The Phantom 4 Pro comes with a 20 megapixel, 1-inch CMOS sensor and can capture up to 11.6 stops of dynamic range. This enables the Phantom 4 Pro to be able to better balance between light and dark, which can be a problem especially when capturing aerial footage. The Phantom 4 Pro also comes with a

new mechanical shutter to help alleviate the "rolling shutter" effect many drones struggled with, and which resulted in shaky footage for quick camera movement. The Phantom Pro can shoot 14 photos per second in burst mode and capture slow motion videos at 60fps. It comes with obstacle avoidance sensors on all four

sides unlike the Phantom 4 and the more recent Mavic Pro which only had sensors on the front. In addition to being able to fly backwards or sideways without worry, the top speed has also been bumped to 31 mph from 22 mph. DJI Phantom 4 Pro starts at \$1,499 (₹1 lac/- approx) and it's available for pre-order on their website.

ECLIPSE

Messy cables are something all of us struggle with

and let's be honest, nobody likes the clutter. ECLIPSE is your solution for cable management and it has fast charging as well!

ORBI Prime

Ever wanted to do photography with your eyewear?

The ORBI Prime records in 360 degrees with four 1080p cameras offering 4K resolution, built-in WiFi, water resistance.

NES Classic Edition

Nintendo's NES Classic Edition

looks and feels just like the original NES and comes with all of Nintendo's greatest and most iconic NES titles. Get one for a nostalgia ride.

TAPS

TAPS can help you use your touchscreen phone with your gloves on. These stickers can make any glove touchscreen compatible and really handy to use in the winter, when gloves are unavoidable.
