

Roomba 980

The Roomba 980 is iRobot's latest automated vacuum cleaner that has the hefty task of picking up the mantle from its predecessor the 880. And to do that, it comes with a slew of additional features like a camera and some localisation technology that is updated the more you use it, but does it fare up to the task? You bet it does.

The camera and the location sensors have made this one far more intelligent than the Roomba series has ever been. The combination of the two allows the Roomba to remember where it has been in your house and hence it can avoid obstacles much better than before. When it comes to the design, at first look it does look awfully similar to the previous models but iRobot has done a few subtle but interesting changes here and there, like streamlining the process into 3 different modes which are indicated by buttons on top of the device.

And finally, the Roomba also has WiFi support and a companion app, that not only allows you to start and stop a cleaning session, but also allows you to schedule the sessions in advance. And in usage, it clearly outperforms the previous models. The only issue with this one might be the hefty price tag that it comes with, but

then, this is a one time investment that would result in you not having to clean your house ever again on your own! You don't even have to be there! If anything was a sign of advanced home robots who would take over the wor... I mean help us do our everyday tasks efficiently, this one is it.

XTRAPREMIUM **TANK UP & TAKE OFF** **OFFER**

Tank up with XTRAPREMIUM petrol. Take off in new HYUNDAI cars.

Fill XTRAPREMIUM petrol worth ₹1000 (for cars) or ₹300 (for two-wheelers) to win exciting prizes*.

SMS <IOC><SPACE><BILL NO.> to 9220066666 Or give a missed call to 9220066666 for IVRS assistance
