

VW concept EV

Volkswagen teases a new fully electronic self-driving car concept with a rectangle steering wheel. <http://digit.in/VWnewEV>

Corrigendum

In our December 2016 issue, ASUS PA329Q was wrongly listed as PA328Q and sequential write speeds for the Samsung 960 Pro should have been 2,100 MB/s.

5. Please change your DVD look and try to add some more utility software.
6. Give Robert's ID at the end of the email section as well so it will be easier to find for first timers.
7. I have moved to the countryside and can't get your magazine so is it possible to get a summary kinda stuff in like once every 2 or 3 months?
I'm in 11th right now so this New Year I'm going to buy a home theater and my parents are giving me a budget

of ₹12K. As I'm a movie freak I watch loads of movies, especially horror. And listen to EDM and trap music all day so I want my room to be booming with all the bass. Thanks guys!

—Sanyam Maan

d Hey Sanyam, We'd really like to help get a Digit issue to your town so we'll put you in touch with our logistics team. You can find our app and mobile game recommendations in the DGT>Greed

section and SKOAR!, respectively. Are you saying our video game posters aren't sexy enough? We are working on the DVD interface and you'll see something new soon. Don't worry about mails not going to Robert, he has the all-seeing eye. For the home theatre recommendation, check out a similar query in the Agent001 section of this issue. Hopefully, that should make your room go booming with bass.

—Siddharth

LETTER OF THE MONTH

✉ The cover story in the Collector's Edition made me a collector. DGT Auto was a master piece. Digit Mini really helped clear misconceptions.

I'd like to give awards to Digit for some of the best content I've come across over the entire year that I've been reading the magazine:

1. Best Article - '15 men and 1 woman' by Adamyia Sharma (Features Editor in 15th Anniversary Edition)
2. Best Cover Story - Our Tech Story
3. Best dymstify - The human brain
4. Best FastTrack - Secure everything
5. Best SKOAR! - Rewriting history
6. Best Poster - Uncharted: A Thief's End

Some suggestions:

7. Please give some videos and articles in Hindi as there are many who are interested in tech, but don't understand English due to the language barrier.
8. Please make App on Digit Quiz
9. Please provide 2 DVDs every month and 3 DVDs in Special Edition
10. Please change the DVD music
11. Please do Phranchise features for AC and NFS

Some criticism:

12. I have gone through your PDFs from 2006 - 2014 and saw that you have reduced the DVD content
13. You don't conduct the DIGIT Contest any more
14. You stopped giving views of celebrities about tech.
15. Another year passes without changing DVD UI isn't. I hope in 2017 it will be changed.
16. Right now I complete my 1 year of reading digit and have lost 3 things:-
 - 1 EDWARD HENNING SIR
 - 2 Jayesh Shinde
 - 3 DVD and DVD content (reduced since 2006).

I got very disappointed and got emotionally flooded on hearing the news of death of Sir Edward Henning & farewell of Jayesh Shinde.

May Sir Edward rest in peace and hoping for a better life ahead for Jayesh. The cover page story drawing are very very good thanks to all designer teammates. Thanks again for being my technology navigator for this year - my offline google.

—Anubhav Prakash

d Wow Anubhav, that's a really long letter with a lot of points that you have made. I'll try and take them up one at a time. Thank you for the positive feedback in from 1 through 6, appreciated

7. We currently have a hindi version of our site, and you can check it out at digit.in/hi
8. Not a bad idea as a part of another app.
9. We are aware of the love for the 2 DVDs of software, but our indepth research of our reader-base suggested that many more prefer the dmystify over the second DVD. Alas, we can't give you this point.

10. Will do so
11. The SKOAR! Gods rarely answer anyone's prayers, so let's see, but don't hold your breath.
12. Answered in point 9
13. We do contests as and when we have goodies to give away. We will try and hold another soon.
14. Turns out celebs are way less geeky than our readers, and they don't want to seem like fools in front of you.
15. I have given up on this. Perhaps the team will finally do something about it, I don't have the energy to beg for it anymore :-)
16. We all miss Edward. He had seen and experienced more of India than all of us put together, and used to translate old documents from Sanskrit to English. He was more "Indian" than all of us, frankly. As for Jayesh, we are sure he will remain in touch and be a critical reader like yourself. You can take people out of Digit, but you can't take the Digit out of them :-)

I will pass on your message to the designers, they will be tickled pink!

—Robert
