

DESIRE

MOBILE WATCH

Stylish, glamorous and interesting smartphones are always on the horizon. We take a closer look at what's hot in this space...

HTC Desire 10 Pro

The HTC Desire 10 Pro comes with some top-grade cameras and is backed by ample amounts of expandable memory to be able to back those pictures you're going to take.

The HTC Desire 10 Pro comes with a 5.5-inch Full HD IPS LCD display and on the back it's got a fingerprint sensor. It runs on an octa-core MediaTek MT6755 clocked at 2 GHz and is backed by 4 GB of RAM and a Mali-T860 M02 graphics engine. The device has a 20 MP rear camera with laser autofocus, dual-colour LED flash and 13MP camera on the front. This phone is powered by a 3000mAh li-polymer battery with the option to fast-charge making it a great choice for multi-tasking and gaming. Expected in February.

Nokia C1

The Nokia C1 marks the return of the iconic phone brand that at one point of time used to lead the mobile market. Nokia's decision to adopt Windows over Android could maybe be the reason for the company's downfall. However, it looks like Nokia have learned from their mistakes and intend to make a comeback with their Android based device. The new Nokia C1 is expected to launch in February and will come with a 5.5-inch Full HD IPS LCD display. It'll run on the Android v6.0(Marshmallow) OS and will be powered by the Qualcomm Snapdragon 652 chipset. With 2 GB of RAM

and an Adreno 510 GPU to churn out all the graphics, this phone should be priced for the average consumer which packing a decent hardware. You have a 13 MP camera on the rear and a 5 MP front camera for your selfies and video calls. The C1 will be powered by a 2,800 mAh non-removable li-ion battery. The one thing we're all hoping for is that Nokia retains its legendary build quality as that'll definitely set it apart from the rest.

Vivo V5 Plus

Vivo is no stranger when it comes to manufacturing quality smartphones, and the Vivo V5 Plus definitely looks like it matches up to those standards. Among the other things this phone offers, what stands out is its excellent front facing camera, meaning this phone is obviously targeted at the selfie enthusiasts. So if you're fond of documenting your day with quality selfies, you could consider the Vivo V5 Plus. The V5 Plus comes with a Full HD IPS LCD display and that's protected by Corning Gorilla Glass. It runs on a Qualcomm Snapdragon 652 MSM8976 chipset and has 4 GB of RAM. Since, we talked about the phone being a selfie-focused device, the Vivo V5 Plus comes with a 13 MP rear camera but on the front we've got a dual lens camera, of 20MP and 8MP each. These are backed by LED flashes that make them the ideal for selfies and video calling.
