

Ferrari J50

Now, owning a Ferrari is a big deal, but there's a select class of elite folk for whom a "normal" Ferrari just won't do. Well, Ferrari has a solution for them, and it comes in form of the limited edition Ferrari J50. The name J50 comes from the brand celebrating their 50th anniversary in Japan, with 50 representing the

year and the J for Japan of course. The J50 is the result of the Ferrari's Special Projects department working with the company's styling center team in Maranello in order to invoke a feeling of nostalgia. The J50 is hugely inspired in design by the Ferrari's of the 70s and the 80s. Through the polycarbonate cover you

can see the 3.9-litre turbocharged V8 which powers this beast and delivers a whopping 680 bhp. The limited edition Ferrari J50 is limited in all senses of the word, with there being only 10 units, each priced at a whopping 2.5 million Euros, not including taxes; but we're sure all 10 units have probably already sold out.

Mercedes-Benz S-Class Coupe Night Edition

The Night Edition is the latest to join Mercedes-Benz' S-Class range and it looks like the best-looking Benz to launch this year. In the words of Mercedes-Benz themselves, the Night Edition combines "the classic proportions of a Gran Turismo with modern luxury and start of the art technology." The Night Edition is also the largest two-door car by Mercedes-Benz yet. If it wasn't implied enough by the name, the Night Edition comes in all black. The window sill inserts, the grilles, the AMG alloy wheels, it's all been blackened. The outside mirrors are also a shadowy tone to add to the dark aesthetic. For the interiors, the buyer can choose the color of the cabin from a selection of combinations such as black/black, crystal gray/black, saddle brown/black and Bengal red/black. The steering wheel

will be dressed in Luxe Nappa leather in the chosen colours. In addition to that buyers can also pick the engine that powers this beauty, with choices ranging between different engines from 367 to 455 hp and rear or four wheel drive.
