

TEMPTATION

CRITIQUE

In this section, we put stuff through the grinder and closely examine what comes out; everything except gadgets, because there's more to life than just that

MOVIE

Arrival

Another sci-fi movie that messes with your head

with automata and the works but Arrival presents a different concept. Challenging the subject of something as fundamental as language, without which no intelligent life-form can advance. The movie emphasises on telling a story about communication and compassion, and makes us introspect about our reactions should we encounter a being of the third kind. Arrival belongs to one of those rare movies that makes you question reality, leaving a lasting impression in your mind. A recommended watch for every sci-fi fan.

If you're asked to imagine a sci-fi movie, you might tend towards movies like 2001: A Space Odyssey, Total Recall, Blade Runner, Alien, etc. You tend to picture a mechanised world

MOVIE

Rogue One

Officially, Episode 3.5

When news of massive reshoots spread, quite a lot of us lost heart for the spin-off/prequel/somewhere-in-the-middle movie from the Star Wars universe. Given that very less of the trailers actually made it to the final movie, we're very thankful to the studio for bringing on Tony Gilroy to fix Rogue One. In its final form, the movie assuages all worries that one might have had about the Mads Mikkelsen and Ben Mendelsohn starrer.

That's right, we're aren't going to mention Felicity Jones or Diego Luna, because they make the most of what's wrong about the movie. Heck, K-2SO, the droid voiced by Alan Tudyk

was way better at getting emotions across among the tiresome trio. The pivotal moment in front of the entire council felt so bland that it made watching paint dry relatively exciting.

The set designs, use of practical effects, and oh! The space battles were so well done, that they immediately make one forget about the lead actors. Add to that, the X-Wing Red and Gold squadrons buzzing all over the place to add a sense of battle chaos. CGI Tarkin certainly pulled off a better job as well. And there's another CGI character that wasn't so well done, but we aren't going to spoil that for you now so go watch the movie dammit!

The spin-offs offer a steady stream of Star Wars content aside from the animated TV series but we believe that we might get a little jaded from all of it. Overall, the movie has accomplished what it set out to do, explore the events between Episodes III and IV while not overly depending on the classic characters to act as pallbearers to what might have been a drastic failure.

John Wick 2
Retirement never comes easy for the super-assassin John Wick as he's forced to jump into the midst of battle to save his own skin from all those whom he had considered colleagues all these years.

Resident Evil - The Final Chapter
Alice and the Umbrella Corporation's hatred for each other shall be put to the test as the final installment (we hope) in the series takes Alice back to where it all began, Raccoon City!

Underworld - Blood Wars
Selene has to fend off attacks from the Lycans and the Vampires while she attempts to finally end the eternal battle between the two factions. Could this be the last?
