Preview pages in Edge browser

Compiled with a plethora of features, Edge could now make its place in the browser race. One of these revamped features is the ability to preview pages. This feature lets you see a thumbnail view of other tabs providing a sneak peek of whether the page has been loaded or the video has been buffered. To do this, open the browser, and click on the drop down arrow button placed at the top next to your last tab. You can also use these thumbnails as tabs to navigate between different tabs by clicking on it.

Use Edge as primary e-reader

Edge now also supports ePUBs. Instead of using third-party apps to read eBooks, you can do it right from your browser. When you purchase an ebook from the Windows Store, it will appear in the new Books section located between reading list and history. To go to the Book section, click

Get the real-time view of your tabs in the thumbnail

on Hub icon (denoted by three lines) > Books.

Set tabs aside

If you always work with a lot of tabs the "Set tabs aside" feature will make a group of the current active tabs and set it aside. This will give you a clean slate to work with other tabs. To do this, click on the "Set these tabs aside" icon located on the top-left corner just before

on your app usage. It also provides an option to turn off the permission for websites to access language list.

Group tiles into folders in start menu

To clear the clutter in the start menu, starting from the Creators update, Windows allows you to group multiple tiles in a single tile folder. This feature has been a part of Windows

Click on each thumbnail to restore it individually

your first tab. To find the tabs that you have set aside, click on the "Tabs you've set aside" icon next to the "Set these tabs aside" icon. Once you are done with your work and want the previous tabs back, go to "Tabs you've set aside" and click on "Restore tabs". This will bring back all the tabs.

Have more control over your privacy

Starting from the Creators update, Microsoft is being transparent about what kind of data it collects. To find privacy settings, just search for "Privacy settings" in the start menu. The privacy settings allow you to turn off the permission to let apps use advertising ID to make ads more interesting to you based

Phone for a long time, however, it has made its way to the desktop operating system now. To group multiple tiles into a single folder, drag a tile that you want to add on top of another and drop it. This will create a folder with those two tiles. To add more tiles to the folder, simply drag and drop other tiles into the folder. Just like other tiles, you can also resize the folder. To do it, right-click on the folder > resize > select the size you want.

Optimise start menu space by using folders of different sizes.

Set a custom background colour and accent

To set custom colour to the desktop background, go to Settings app > Personalisation > Background. Choose the fit to Center or Fill, click on the "+" next to the custom colour > select your desired colour. If you have a particular hex colour code, you may also enter it by clicking on the More button.

To set custom accent colour, click on Colors tab located at the left, followed by "+" Custom color button. Choose the custom colour you want. You can see the realtime preview of the new colour on the buttons, hit "Done" when you have the colour you want.

Enable Dynamic locking system

The Dynamic lock feature connects between your phone and your PC using Bluetooth to automatically lock your PC when your phone goes out of range. This is a neat feature aimed at offering a different level of security. To enable dynamic locking, first, pair your smartphone with your Windows desktop using Bluetooth. Navigate to Settings > Accounts > Sign-in options > under Dynamic lock enable "Allow Windows to detect when you're away and automatically lock the device".

Henceforth, if you leave your PC unlocked and move away with your phone from
