

the proximity your PC will be automatically locked after 30 seconds. However, if someone intercepts the PC before it locks it will not lock. Bluetooth connectivity is not that reliable so sometimes it won't work as expected.

Get themes via the store

Themes for your Windows 10 system can be downloaded from the store. Here's the hot-link to directly redirect to the theme section of the store: <http://aka.ms/themesinstore>

To get a theme, select a theme and click on the "Get" button. This will download

Click on the "Get more themes in the Store" button to directly go to the themes section of the Store

the theme on your system. To apply the downloaded theme, go to Settings > Personalization > Themes > Select downloaded theme.

Set recurring reminders with Cortana

Among the few new abilities of Cortana, you can set recurring monthly reminders. Click on the "Ask me anything" field and ask it to set a reminder. To recur, click on "Only once" > Select everyday or specific days of the month or week. Once everything is alright, click on "Remind" button.

Try the new Game Mode

Game Mode on Windows 10 prioritises your game over other programs running on the system and allocates all

the computing resources to the game.

Game mode automatically turns on when a game starts. This only works if the game is downloaded from the Windows Store. However, if you want to enable it manually, run the game and use the Windows hotkey: Windows logo + G. Click on the "Settings" icon > check "Use Game mode for this game". This will enable game mode.

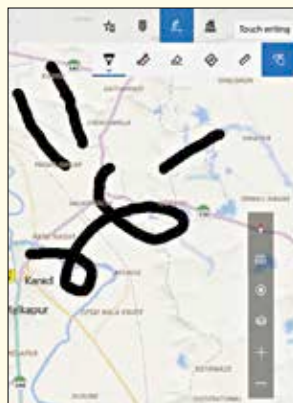

Use Picture-in-Picture mode

If you are working with video-focused programs, you can use the picture-in-

picture mode to use multiple applications at once. To use picture-in-picture mode, first, play some content on Films & TV app. As the video starts, you'll see a small box button on the control bar next to the full-screen button. Click on the button and you'll be into the picture-in-picture mode.

Annotate over pictures and maps

The Creator's update adds the inking feature to the Photos app. This can be used to quickly annotate pictures to share on social media. To annotate a picture, open the

You can't draw without selecting the "Touch writing" tool first

photo using Photos app, click on Draw and choose your brush. Annotate your photo and click on the Save button to save a copy of that photo as the annotated version.

Similarly, you can also annotate in maps. Launch the Maps app, click on the brush button (Windows Ink toolbar) located at the top-right corner of the screen. Select the brush you want to use followed by the brush colour and the size. To start drawing, select the "Touch writing" button from the menu.

Broadcast your game

The new update has also added the ability to broadcast your game using Beam. This makes it easy to broadcast your game without using any extra software. Additionally, Beam's low-latency technology enables broadcasters to stream their gameplay without experiencing lag. To broadcast a game, open the game bar (Windows key + G) while playing a game and click on Broadcast.

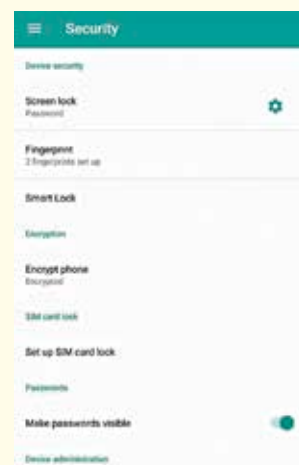

To broadcast using Beam, sign in to your Microsoft account first.

ENCRYPT EVERYTHING!

Your smartphone

To set up encryption on your Android phone, go to Settings > Security and click 'Encrypt phone'. It's a fairly long process so be prepared to wait. Do note, the only option to recover is to factory reset your phone. On an iPhone, go to Settings > Touch ID & Passcode > Turn Passcode On. You can add longer numerical passcodes by selecting Passcode Options > Custom Numeric Code. You can also a custom alphanumeric code from the same menu.

Rebooting your phone with a 20 char password isn't fun

Your calls

Whatsapp calls are end-to-end encrypted by default, meaning that no one else, not even Whatsapp can listen in. If you prefer something with a bit more of security focus, Signal from Open Whisper systems is a great alternative. As a bonus, both of these apps support video calls as well and are available on both Android and iOS devices.

Your texts

Unlike calls, regular cellular texts can be encrypted
