

Instagram's bug kid

Adrian Kozakiewicz has more than 1,56,000 followers which he gained by putting colourful bugs on his face. <http://dgit.in/Bugstagram>

Plug me in' in Mumbai

Wiebe Wakker travels around the world relying on people's kindness. 41,000 kilometers later, finally arrives India <http://dgit.in/PlugMeIndia>

Agent 001

8GB of RAM, 2 to 4GB memory in the graphics card and 1TB of storage. I also need an Intel Core i5 processor. Please suggest the best one that I can get in this range.

– Vasi

A Hey Vasi, you should look into the ASUS R558 series of laptops. Go through the specifications of the lineup, make your choice and check whether that particular SKU is selling in India.

Beats under 10k

Hey, I wanted to buy a portable speaker under ₹10,000 and an earphone under ₹3,000. Please suggest me something.

– Savan

The UE Roll 2 is a great choice

A Hey Savan, check out the UE Roll 2 portable speaker, that would be your best bet or you could also go for the UE Boom. If you put in some extra money, you can go for the UE Boom 2 which is a great option. As for the earphones within your budget, have a look at the Audio-Technica CKX5 and JBL Synchros E10. It would be best to head over to your local retail store, listen and experience these earphones (and portable speaker as well if you'd like) before buying.

Phone for new bloggers

Hi Digit. I need a phone for a project. What would be the best phone under ₹15,000 for playing games and taking good quality pictures for a blog?

– Manish

A Hey Manish, we would recommend the Coolpad Cool 1 as it manages to balance out well in terms of performance and camera quality. If you want

more performance then you can go for the Lenovo Z2 but do note, the camera quality on this is lower than the Cool 1.

Durable earphone

Hey guys, which one among the two is better? Sennheiser CX180 or Brainwavz Omega? I was looking for something under ₹1,000. I just want something in good quality and durability.

– Febin

A Hi Febin, the Brainwavz Omega reproduces better audio quality, balance and has passive noise cancellation to an extent. The bass response reproduced on the Omega is much better than the CX180. The build quality on the Omega is also superior. In this range, you can try out the Altec Lansing MZX147 which comes in second in this range.

You'll get better audio and build quality on the Brainwavz Omega

Best phone under 15k

I'm trying to search for a good phone under ₹15,000. Please suggest me the best one I can get.

– Mohan

A Hey Mohan, there are several good phones that you can go for under that budget. Have a look at the LeEco Le 2 for good performance, Redmi Note 3 for good battery life and the Nubia Z11 Mini for a good camera.

An "exciting" laptop

Hello! I want to buy a new laptop with exciting features at an affordable price of under ₹35,000. It should have a 2GB graphics card, 1TB HDD, 4GB RAM, Intel

Core-i3 or i5. Please suggest one with these specifications.

– Aravind

A Hello Aravind,

There are many options in this range that perform well. We would recommend two among them, either the

The ASUS A555LF series has some amazing colour variants available

Lenovo IdeaPad 100s or the ASUS A555LF. Later, you can upgrade the storage with an SSD and also expand the memory modules.

Making the move to mechanical keyboards

Hello team, I'm looking for a gaming keyboard. It should be mechanical and include backlighting, RGB isn't necessary. Please suggest me one with genuine Cherry MX mechanical switches because I don't want the new duplicate ones. Also, this will be my first mechanical keyboard and my budget is strictly under or around ₹10,000.

– Arindam

A Hey Arindam, if you're looking for a keyboard under ₹10,000 and Cherry MX switches are mandatory then you don't have many options. You can go for the HyperX Alloy FPS which has red LED backlighting and you can also look at the G.SKILL Ripjaws KM570 which has RGB lighting. If you don't mind working without a numpad, then you can check out the Corsair K63 or the Cooler Master MasterKeys Pro S. All of these keyboards are under ₹10,000 and ship with Cherry MX switches. Coincidentally, we have a gaming keyboard comparison test this month, so do check it out. **d**
