

MOVIE

Guardians of the Galaxy Vol. 2

★★★★☆ | The first Guardians of the Galaxy was in our opinion one of Marvel's best movies but then again, Marvel's movie game is pretty strong. We went into Guardians of the Galaxy Vol. 2 expecting a good movie, but we were also expecting some kind of continuation to Marvel's overall cinematic universe's plot and maybe some insight into the next movie in Marvel's line up. While we did get a good and really enjoyable movie, that's about the only expectation that was met.

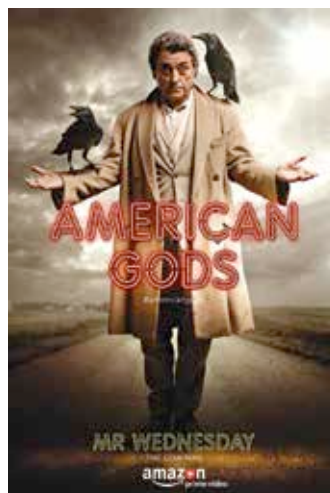

We're not saying that focussing more on Starlord's backstory is a bad thing, but we left the hall with a somewhat empty feeling. But the movie did drop some serious hints about there possibly being a Vol. 3 somewhere in the near future. Along with a key Marvel character teased in a post credits scene, we may also see a few main characters from the GotG in the next Avengers/Thor movie. At the end of the day, it was an enjoyable watch.

TV SHOW

American Gods

★★★★☆ | American Gods is a new TV series based on Neil Gaiman's novel of the same name. The show's setting is pretty straightforward – Old gods vs the new. None of us here have read the book, so it's all new to us. From what we've heard on the interwebs, the show is supposedly following the book to the T, so maybe by the end of the entire series, we might not have to read the book at all.

The protagonist's name is Shadow Moon. If you think that sounds like it's out of some angst-y teen vampire novel, you're not alone. Fortunately, the man himself is nothing like what you'd expect. The second character you meet, Mr. Wednesday, is shrouded in mystery, just like the series itself. We would like to point out here that Ian McShane makes an amazing Mr. Wednesday. We don't really know what to expect of this series. Four episodes in (there were only four out as of writing this) and we were still lost. In conclusion, we're very confused, but intrigued. You can watch new episodes of American Gods every Monday on Amazon Prime Video.

UPCOMING MOVIES

Wonder Woman

This is the next movie in DC's line up of movies after Batman V Superman. We're actually quite excited to watch this one,

especially if the trailers are anything to go by. No matter what the world says, we liked Dawn of Justice and we're looking forward to Wonder Woman and the new Justice League movie *cue theme music*.

The Mummy

The Mummy is getting a reboot. We're normally against reboots, especially since most of them don't work

out. So when a franchise we like announces a reboot we're usually on edge. Here's hoping this reboot doesn't ruin the franchise.

Transformers: The Last Knight

Woo. Another Transformers movie. Michael Bay pls, stahp. Mercy us. Ty. *sigh* – throws money at movie

anyway – You win this time Michael Bay! You win this time...

Despicable Me 3

This kind of popped up out of nowhere but we liked the first two so why not. Turns out Gru has a twin brother, named

Dru, obviously! Also, he seems to be better than Gru in pretty much every department. Crime included.
