

Xiaomi Mi6

THE XIAOMI MI6 is easily one of the most anticipated phones when it comes to upcoming phone launches. The Mi6 has a lot going for it, with some of the best specifications you'll see on a phone at this price range. On top of that, it comes with a great set of 12MP dual primary cameras and an 8MP front camera. Xiaomi really loves to outdo themselves, last year they'd revealed the Mi Mix which had the phone world in a tizzy. Now they've got the world excited over the Mi6. One of the biggest changes in Xiaomi's latest flagship will be the missing headphone jack. They've done this in order to incorporate a larger battery but we're not so sure if fans will appreciate that change. But Xiaomi assures fans that USB Type-C will deliver better audio quality. Some of the other fancy features in the Mi6 are its dual speakers, a 3350mAh battery, 6GB of RAM, and 'four-sided 3D glass'.

Nokia P1

EARLIER THIS YEAR we saw a reincarnation of sorts for Nokia who came back with a bang. They'd finally ditched Windows and were now back with Android. The Nokia P1 is a powerhouse with a price tag to match. It's expected to cost a whopping ₹54,390/-. But will it have the specs to match the price? Here's what we know. The

Nokia P1 will come with 5.3-inch FHD IPS LCD display with a resolution of 1080p. On the inside it's powered by a pair of dual-core Kryo processors, each clocking at 2.15GHz and 1.59GHz respectively. Juicing it is the new Qualcomm Snapdragon 835 and a solid 6GB of RAM. On the camera front we've got a 22.5MP primary camera and a 8MP front camera. It's 'High Dynamic Range' mode allows for image capture in resolutions of 5160 x 3872 pixels and videos in 4K. As for battery, it's got a 3500mAh battery, which should suffice for a whole day of usage.
