FLAGSHIP COMPARISON:

Battle of the best

Three of the best phones out there go up against each other. Is the winner a foregone conclusion?

Prasid Banerjee | prasid@digit.in

I

We're halfway through the year, and three flagship smartphones are vying for your attention. It's time to find out which one is the best.

With the first three flagships officially in the country, the smartphone wars of 2017 too have officially begun. The Sony Xperia XZs, Samsung Galaxy S8 and LG G6 are only the beginning, but we figured you're probably looking to find out which of these you should buy, or, at the very least, which one pulls ahead of the others.

Truth is, flagships are losing their sheen by the day, but they still make the top of the line in the market today. They are signs of technology that'll eventually make it to cheaper smartphones that are easier to attain. So, what are these three smartphones telling us? Read on to find out.
