

DOES THIS SECTION EVEN NEED AN INTRODUCTION? FROM COMPUTERS TO MOBILES, AND HEADPHONES TO GPUS, IT'S ALL HERE...

TECH-LOVE

THIS MONTH IN TECH:

We explore where and how solar power was developed in Origins this month, moving on to talking about external GPU boxes, and then profiling upcoming startups in the health sector. Apart from regular gadget reviews, we are starting off a new section where two devices or software are compared head-to-head. For all you guys typing on dirty keyboards, we have a special DIY guide to cleaning keyboards.

AI learns parkour

Google's subsidiary DeepMind's latest research reveals how AI is teaching itself parkour and other robust techniques to get around in complex environments in their latest paper. <http://dgit.in/AIparkour>

WHAT'S NEW

AMD Ryzen 3 and Threadripper announced

The announcement happened without much fanfare via a video (<http://dgit.in/Ryzen3T>) featuring AMD CEO Dr. Lisa Su, John Taylor and Robert Hallock who went through the specifications of the two SKUs and ran benchmarks. The results of which were quite incredible. The new Threadripper CPUs will have up to 16 cores and 32 threads and require an all new socket and chipset i.e. the 4094-pin TR4 socket along with the new X399 chipset. We have information about two new SKUs – Threadripper 1950X and Threadripper 1920X. The former being the 16-core/32-thread flagship while the latter being a 12-core/24-thread

CPU. The 1950X will be priced at \$999 and the 1920X will come in for \$200 fewer i.e. \$799. On the Ryzen side, the two new Ryzen 3 SKUs are the 1300X and the 1200, both of which are 4-core/4-threaded CPUs with a pretty decent range of clock speeds and 8 MB of L3 cache. <http://dgit.in/AMD3T>

Share any file type on WhatsApp

Whatsapp now allows users to share any file type via its social messaging platform. The feature first spotted in beta version is now rolling out for all Android users. Android users can send files up to 100MB in size while web users can only send files up to 64MB, but reports suggest that iPhone users can send slightly larger files.

The new update allows users to send any kind of file including zip files or APKs of

mobile apps. Users can also see all of their photos and videos in the in-app camera by swiping up. WhatsApp will also retain original quality of the images and stop compressing photos altogether.

The update may not be available right away but should become available for everyone in the coming days. <http://dgit.in/WhatsAPK>

How checkers was solved

The game of checkers has roughly 500 billion billion (5×10^{20}) possible board positions. This is a story about two men, a duel, and the quest to build artificial intelligence long before Garry Kasparov and Deep Blue or Lee Sedol and AlphaGo. <http://dgit.in/CheckDuel>

Hacker steals \$32 Million in Ethereum

At least three different accounts were compromised for a total loss of \$31,725,019 USD worth of ether from Parity (an ethereum client). The new cryptocurrency has been gaining a lot of attention worldwide lately and it was only a matter of time before hackers started working. <http://dgit.in/32ether>

Android O Reddit AMA

Google's Android O engineering team's Reddit AMA answered a lot of questions about the upcoming OS on Reddit. The team talked about Project Treble, Themes, Blob Emojis and a little more. Find out what's on the way. <http://dgit.in/Oama>
