best to run a couple of benchmarks straight for an hour or two to check the card's stability. Ideally figure out how long each of your gaming sessions last and test for a time period greater than that.

Now that you know how a graphics card can get damaged, what signs to look out for, and how much to pay, it's time to figure out which ones you should get. Fortunately, most of the graphics cards which are being used for mining are of the current generation. AMD GPUs have the advantage of being the better performers at mining cryptocurrency so you're likely to

find R9 300 and R9 200 series cards as well. Bagging a Fury or Fury X for 60% of the price is still a good deal. I'd say the R9 390 falls in the grey area of being a good deal. The best would obviously be those which are current i.e. RX 400 / 500 series and the NVIDIA GTX 10-series cards.

As long as you follow these steps and opt for the right generation of cards, you'll be getting a really good deal as the card should easily last you more than a year and give you your money's worth. The only issue is that you'll have to undertake a fair amount of effort. Good hunting!

BUYING ADVICE

BEST LAPTOP UNDER ₹20,000

Q Hey guys, I'm interested in getting a laptop under ₹20,000 since my budget is very stringent. I'd like to do a little bit of gaming as well. Help me out guys.

—Pradyuman Chattopadhyay

A You can certainly go for the HP BAO35AU which sports an AMD E2-7110, 4 GB of RAM and 1 TB of HDD storage. There's hardly any laptop with great onboard graphics in this segment so you're going to have make do with just the Integrated graphics. Another great option is the Acer Aspire ES 15 which also comes with an AMD APU which in this case, is the E1-7010. The RAM and storage capacity is the same as the previous laptop. You can always make do with Linux which is pretty much as feature rich as Windows is. Gaming support will be minimal but you can always install Steam and see how many casual games your machine can run since Steam has a vast Linux library now.

BEST MOBILES UNDER ₹20,000

Q Hey Digit, my OnePlus 2 recently conked off and I'm looking for a good smartphone to replace it. What should I get that has a great camera and ample amount of storage space?

—Heymanth Kumar

A If you are planning to buy the best smartphone under ₹20,000, you can't get anything better than the Moto G5 Plus currently. The G5 Plus combines dependable performance, decent battery life and a best in class camera into a single package. If not the G5 Plus, you can go for the Lenovo Z2 Plus. With a powerful Qualcomm Snapdragon 820 on-board, the Z2 Plus overpowers the competition very easily and further strengthens its position

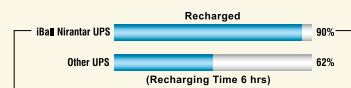

with 4GB of RAM and 64GB of storage, making it a very good phone under ₹20,000. Another great phone in this segment is the Coolpad Cool 1. Available with dual camera, the Le 2 brings refined design to the table, along with outstanding performance. The Qualcomm Snapdragon 652-powered device is quite powerful, and has one of the better cameras in the sub-20K segment.

RICHARD MAY NOT **BE READY** BUT
iBALL **NIRANTAR UPS** RECHARGES
33% FASTER THAN ANY
STANDARD UPS

Express Recharge.
High Performance.

iBall Nirantar UPS
bali NO LOSS. BOSS!

Only iBall Nirantar UPS gives you that extra backup facility
(Faster recharging makes it ready for extra backup in less time)
