

MOVIE

Spider-Man: Homecoming

★★★★★ | We went into Spider-Man Homecoming expecting the usual Spiderman rehash/origin story and were fully expecting to see Uncle Ben die again (sorry Spidey) but we were pleasantly surprised. We can definitely say that Spider-Man Homecoming is the best Spiderman movie yet.

This is, of course, not the first time we've seen the Web Slinger in the Marvel Cinematic Universe. He first made his appearance in the Avengers: Civil War where he immediately captured quite a few hearts. So expectations were pretty high for Homecoming and we can safely say that he delivered and then some.

Rather than another origin story, Homecoming revolved more around fleshing out Peter Parker's character. It does a good job of showing us the struggles he faces; having to juggle his teenage life and the responsibilities of being Spider-Man.

Michael Keaton does an amazing job as the Vulture and definitely deserves to be mentioned here, but of course he doesn't take anything away from Tom Holland who looks like he was born for the role of Spiderman. If you're a fan of the web crawler, you'll definitely enjoy Homecoming. Heck, if you know nothing about the MCU, you'll still enjoy this movie. Definitely a must-watch in our books.

UP AND COMING

MOVIE

The Hitman's Bodyguard

What would happen if the world's best bodyguard was assigned to protect the bad guy he's been saving people from for years? Comedy apparently. And a lot of action. We're looking forward to The Hitman's Bodyguard. Release date: August 18, 2017

GAME

Agents of Mayhem

From the creators of the crazy Saints Row games comes the Agents of Mayhem, an open-world action game. The game's actually set in the same fictional universe. Expect the same (or possibly more) madness in this game. Release date: August 18, 2017

TV SHOW

GoT S07E01: Dragonstone

★★★★☆ | The one thing that you can take away from Season 7 of Game of Thrones is that it will be the battle between two of the most powerful Queens that the Kingdom of Westeros has ever seen. Each queen with her own sweet map room.

Arya Stark seems to have turned into a stone cold killer, as was envisioned in the books, and we get a taste of her medicine at the very beginning of the episode.

Much of the storyline seems to be centred around the Lannister twins, Stark children, and Daenerys. The Dorne plot seems to have been completely written off in a rather pitiful manner. However, the vacuum of the Dorne storyline will be filled by Euron Greyjoy who's had a pretty great introduction to the series.

That's as much as we'll say about the first episode without giving away major spoilers. We're considerate that way. Let's just say that it seems to serve mainly as a setup for the rest of the season yet to come. You can read our complete review over here: <http://digit.in/GoTS7E1rev>

Spoiler alert, you have been warned.

TV SHOW

The Orville

The Orville is an upcoming sci-fi sitcom which will be starring Seth MacFarlane, the guy behind half of the voices in Family Guy. The show will take place on starship U.S.S Orville. We're definitely checking it out. First episode airs September 10, 2017.
