

Military tech for delivery

Amazon wants to use military food technology to create special prepared meals that don't need to be refrigerated. <http://digit.in/amazonfood>

Bacteria for solar energy

A chemically modified bacteria covered with tiny solar panels could be the key in creating renewable solar fuel. <http://digit.in/bacteriaSun>

How to stream movies and TV shows online for free for a year

You could technically watch all you want – but there's a catch.

Arnab Mukherjee | arnab@digit.in

S

treaming content online is increasingly becoming the standard way to experience multime-

dia. Today, we have the option to choose from Amazon Prime Video, Hotstar, Netflix and quite a few other local streaming services and with each choice comes unique offerings and benefits. But what a lot of these services do have in common is a free trial period.

If you were to combine these free trial periods and just consume content without looking for a specific show, you might actually be able to stream for free for a much-much longer period of time than you imagine. Let's give it a shot based on the popularity of the services.

(Disclaimer: This is not an article for streaming hacks. We do not recommend or support any illegal method to avoid payment on any streaming service)

(Disclaimer 2: This is not useful if you're looking for specific shows. If that is the case, it pains us to let you know that you're on the wrong article!)

NETFLIX

Since it's India debut in January 2016, we've been introduced to a host of original content along with tons of amazing TV shows and movies. Netflix

NETFLIX

is a bit expensive at a minimum of Rs. 500 per month.

But, on the other hand, they do offer a month's trial period. So, we already have a month where you can watch Stranger Things, House of Cards, Narcos, Orange is the New Black, The Crown, Daredevil and more! Just forget that you have a life.

Free for: One month

Total count so far: One month

AMAZON PRIME VIDEO

Amazon launched their video streaming service in India in December 2016 – as a part of their Prime subscription. Priced at Rs. 499, it is still an introductory offer. But just in case you want to test it first, go for the month long free trial to enjoy shows like American Gods, The Grand Tour, The Man in the High Castle, and tons of regional content as well. While the content may not match up to Netflix in quantity, it is definitely cheaper.

Free for: One month

Total count so far: Two months

amazon prime video

HOTSTAR

Along with quite a few local movies and shows available for free, Hotstar has an entire Premium section dedicated to quality content from all over the world – movies and TV shows.

With IPL and Game of Thrones, Hotstar enjoys good popularity, if only for a short while every year. Hotstar also offers a one month trial for its Rs. 199 monthly subscription.

Free for: One month

Total count so far: Three months

HOOQ

Hooq contains an extensive catalogue

of popular local and Hollywood content with shows like The Big Bang Theory, Flash, Arrow, Supergirl etc.

The monthly pricing starts from Rs. 79 and is available for PC, Android and iOS devices, along with a week-long free trial.

Free for: One week

Total count so far: Three months, one week

HOOQ

YUPP TV

Offering over 200 live Indian TV channels, movies and web series on their platform, Yupp TV has a premium tier with channels like MTV, Colors, NDTV and more. For its premium plan of Rs. 99 per month, you get a free trial period of a week.

Free for: One week

Total count so far: Three months, two weeks

AND MUCH MORE

While that's it mainly for trial periods on offer out there, if you're looking for anything to stream, you could go on with services like Voot (which is entirely free), Spuul, BoxTV, Hungama and DittoTV offering free tiers for every user. In fact, some of these services offer exhaustive catalogues, especially if you're in the market for Indian content.

Free for: Indefinite time

Total Count: Indefinite time

That being said, the real quality that these services offer cannot be judged entirely in the free trial period. Whether it is Netflix originals or all the Bollywood movies from yesteryears, you can never really finish it all in the trial periods. On the other hand, why say no to at least 3.5 months of good, free content?
