

CHANGING THE FACE of the INDIAN GAMING INDUSTRY

When the spectacular grand finale of the Taiwan Excellence Gaming Cup drew some of the biggest crowds for a gaming championship, Indian gamers cheered like never before. They have every reason to because the Taiwan Excellence Gaming Cup (TEGC) is one of the few gaming tournaments that have changed the face of the Indian gaming circuit in the recent past.

Having made its debut in 2014, TEGC soared high on the popularity meter and managed to stand out from the pack with its stunning format, big prizes and extremely advanced technology. The fourth season of TEGC offered a versatile collection of games such as DOTA 2 and Counter Strike GO.
