

Art of Blade Runner: Black Out 2022
Black Out 2022 is a brilliant anime short explaining the events between the first and second Blade Runner movie. <http://digit.in/BRANmArt>

The Talisman movie
Stephen King is on a roll as another book of his, The Talisman, is getting a movie adaptation soon. <http://digit.in/SKTalisman>

Or maybe I'm just pissed about not being one of the special ones to have the 280 character limit bestowed on him? Either way. Boo twitter!

BooMan @BooManHate · 13m

But in a world where everyone thinks they're special, it soon becomes apparent that no one is... And none are special, not on that network!!

BooMan @BooManHate · 13m

Will it pay off? I don't think so. Because the problem with the platform is the users, who are supposedly some of the wittiest people alive.

BooMan @BooManHate · 14m

And, of course, users went nuts – some liked it, others howled. Heck, some edited down long posts from others to prove the move unnecessary.

BooMan @BooManHate · 15m

All this really did was merge two posts into one, and that too only for select special users. A typical twitter-elitist way of doing things!

BooMan @BooManHate · 15m

In this case the change is to double the limit per post to try and woo users who are otherwise fed-up with the 140 character limit, like me!

BooMan @BooManHate · 16m

So what do you do when you're getting beaten up in the stock markets, and also in the boardroom? You change something and hope for the best!

BooMan @BooManHate · 16m

However, once you're committed in a certain direction by pressure by the competition, it's impossible to change the focus of your company.

BooMan @BooManHate · 17m

See how shite it is to read an article like this? Disjointed sentences and having to scan through so much wasted space! Just a crying shame!

BooMan @BooManHate · 18m

The world moved to concatenated SMSes in the early 2000s, but we still loved the retro style of saying something in as few words as possible.

BooMan @BooManHate · 19m

The real problem with the social network is that it is stuck in the 1990s where packets were precious and character limited SMSes were born.

BooMan @BooManHate · 19m

Examples of their user base include an orange headed buffoon who is making the platform infamous, and everyone who uses one-liners non-stop!

BooMan @BooManHate · 20m

It's a social network that feels full of fake trolls and bots; and the users that are real, most seem to be insufferable, pathetic, whiners.

BooMan @BooManHate · 20m

There's a social network I hate. Actually I hate them all, but I hate this particular one with the passion of an angry, jaded Italian woman.
